Motor connection housings	
Group size 4	D.68

RockClassic series

RockClassic
– the solution for standard use

RockClassic Stainless
– the version with corrosion protection

D

Weidmüller's RockClassic standard housings are robust enclosures made of aluminium die-casting or self-extinguishing thermoplastic (type HAD7).

They are available in different versions, with or without a fixed cover and with mobile protective covers.

RockClassic housings have metric or PG threads. Customers can use Weidmüller's specially developed PG-M Finder to identify every thread quickly and easily.

The black RockClassic Stainless housings with additionally hardened surface are ideal for particularly aggressive environmental and climatic conditions.

All metal parts consist of stainless steel to guarantee optimum corrosion protection.

Weidmüller also offers RockClassic housings with several cable entries as a standard feature.

This means that different cables can be introduced individually into the housings, offering the user enhanced strain relief and greater tightness. This version is particularly recommended when using Weidmüller's modular system.

- Sizes: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12
- Protection: IP65 / IP54 (plastic enclosure size 1)
- 2 types: high, low
- Fastening systems:
 - Side locking on top/bottom
 - End locking lever
 - Central lock in some cases
- Material: aluminium die-casting alloy
- Designs:
 - Silver-grey powder coating
 - Black corrosion protected

RockClassic series

Plug Hood Types

Plug hoods are used in most applications with the female inserts and the hot end of the connector. Modular connector inserts require a high configuration plug hoods.

Bulkhead Housings

Bulkhead housings are used for tough panel bulkhead applications. Weidmüller supplies bulkhead housings with a gasket to create a seal between the panel cutout and the bulkhead housing. In addition, Weidmüller offers bulkhead housings with or without covers. For measurements of the panel cutout, see the dimensional drawings and chart on the page XIV.

With locking spigot

Base Housings

Base housing are used for surface mounting on a base plate. Weidmüller base housing are available for all pole numbers and group sizes and can have either one or two side-cable entries. Base housings are offered with or without covers.

RockStar series

For the toughest demands and special needs

Weidmüller RockStar housings are robust and consist of aluminium die-casting. They comply with the high protection rating IP68 and are pressure proof up to 5 bar.

The housings in the RockStar Impact family have a special coating to withstand even the toughest mechanical loads.

Weidmüller also supplies housings in the RockStar XXL family with maximum circuitry space and enough room for large cable glands.

All fixing screws are produced in top quality VA steel.

Available in various designs with mobile protective covers.

Weidmüller offers RockStar housings with metric thread.

- Sizes: 1, 3, 4, 6, 8, 12
- Protection: IP68 / 5 bar
- 2 types: high, low
- Fastening systems:
 - Screw closure, free choice of screw type, fixing screws with seal
- Material: aluminium die-casting alloy
- Designs:
 - Black powder coating
- Integrated peripheral metal protective collar on the hood
- Seals on the bulkhead housing:
 - Interior O-ring or
 - Peripheral flange seal
- Corrosion protected, no risk of contact corrosion

RockStar series

with additional protection from electromagnetic interference (EMC)

RockStar Shielded housings are immune to electromagnetic interference.

This series is also available in the XXL version, providing maximum circuitry space and sufficient room for large cable glands.

- Sizes: 1, 3, 4, 6, 8, 12
- Protection: IP68 / 5 bar
- 2 types: high, low
- Fastening systems:
 - Screw closure, free choice of screw type, fixing screws with seal
- Material: aluminium die-casting alloy
- Designs:
 - Black powder coating
- Integrated peripheral metal protective collar on the plug housing
- Seals on the bulkhead housing:
 - Interior O-ring or
 - Peripheral flange seal
- Corrosion protected, contact corrosion precluded
- Protection from electromagnetic interference

Motor connection housings

Size 4

Long locking clamp on the lower part

The plug-and-play solution for your motor.

With short assembly times and free choice of connection technology, this is Weidmüller's low-cost solution for heavy-duty connectors.

The angled housings HDC HB 10 AWVL replaces the motor terminal box.

The fitting position can be offset by 90° at a time thanks to the fastening grid of 68 x 68 mm.

Compatible with all standard connector housings with long locking clamp.

Suitable for use with standard inserts of the HE-10 series 8 (either screw, tension spring or crimp connection technology) or inserts from the modular ConConcept system.

D You will have never changed a motor this quickly!

HDC HB 10 AWVL

Type	Qty	Order no.
HDC HB 10 AWVL	1	1790040000

Technical data

Material	Aluminium die-casting alloy
Surface	Power coated RAL 7037
Locking elements	Galvanised steel
Seals	NBR
Temperature range	-40 ... +125°C
Protection in locked state	IP5 acc. to DIN 40050
