Magma X

Part No:
AA.178.301111

Description:

Magma X IP67 Magnetic Mount GPS L1/L5, External Antenna with 3m RG-174 SMA(M)

Features:

GPS L1 & L5/IRNSS Band Operation
Magnetic Mount
Low Noise Figure
Excellent Out-Of-Band Rejection
Low Axial Ratio
Cable: 3m RG-174
Connector: SMA(M)
RoHS & Reach Compliant

1. Introduction

The Taoglas Magma X AA.178.301111 is an active, external magnetic mount, GPS antenna supporting both L1 and L5 bands. The L5 band also operates at the same frequency as IRNSS, so the Magma X can be used to operate on this constellation. It is a dual-band, high performance, economical solution for the highest accuracy centimeter-level tracking applications.

Typical applications include:

- RTK Applications
- Precision Agriculture
- Navigation

This compact antenna exhibits excellent radiation patterns on both L1 and L5 bands and with a low noise figure to preserve signal quality helps minimize time to first fix. It also features excellent out-of-band rejection to prevent out-of-band signals from overdriving or damaging its LNAs.

This antenna has been tuned and tested on a 70 x 70 mm ground plane, working at GPS L1, 1575.42 MHz and IRNSS / L5, 1176MHz, with a 2 stage LNA ensuring good signal strength. It can operate with an input voltage ranging from 1.8 to 5 volts.

Cable length and connectors are fully customizable. Contact your regional Taoglas customer support team to request these services or additional support to integrate and test this antenna's performance in your device.
