This publication is the proprietary of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.

The application circuit examples in this publication are provided to explain the representative applications of SHARP's devices and are not intended to guarantee any circuit design or permit any industrial property right or other rights to be executed. SHARP takes no responsibility for any problems related to any industrial property right or a third party resulting from the use of SHARP's devices, except for those resulting directly from device manufacturing processes.

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that occur in equipment using any of SHARP's devices, shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP's device.

SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structures and other contents described herein at any time without notice in order to improve design or reliability. Contact SHARP in order to obtain the latest specification sheets before using any SHARP's device. Manufacturing locations are also subject to change without notice.

Observe the following points when using any device in this publication. SHARP takes no responsibility for damage caused by improper use of the devices.

The devices in this publication are designed for use in general electronic equipment designs, such as:

- Personal computers • Office automation • Telecommunication equipment
- Test and measurement equipment • Industrial control
- Audio visual and multimedia equipment • Consumer electronics

The appropriate design measures should be taken to ensure reliability and safety when SHARP's devices are used for equipment such as:

- Transportation control and safety equipment(i.e., aircraft, trains, automobiles, etc.)
- Traffic signals • Gas leakage sensor breakers
- Alarm equipment • Various safety devices etc.

SHARP's devices shall not be used for equipment that requires extremely high level of reliability, such as:

- Military and space applications • Nuclear power control equipment
- Medical equipment for life support

Contact a SHARP representative, in advance, when intending to use SHARP's devices for any "specific" applications other than those recommended by SHARP.

Contact and consult with a SHARP representative if there are any questions about the contents of this publication.

(1) Application

This literature applies to LQ038Q7DB03.

(2) Overview

This module is a color reflective and active matrix LCD module incorporating amorphous silicon TFT (Thin Film Transistor), named AD-TFT(Advanced TFT). It is composed of a color TFT-LCD panel, driver ICs, an FPC, a back light, and a back sealed casing. It isn't composed control circuit. Graphics and texts can be displayed on a 240×3×320 dots panel with 262,144 colors by supplying.

Optimum view angle is 6 o'clock. An inverted display mode is selective in the vertical or the horizontal direction.

(3) Mechanical specifications

Table 1

Parameter	Specifications	Units	Remarks
Screen size (Diagonal)	9.54 [3.78"] Diagonal	cm	
Display active area	57.6 (H) × 76.8 (V)	mm	
Touch panel active area	57.9 (H) × 77.8 (V)	mm	
Pixel format	240(H)×320(V) (1 pixel = R+G+B dots)	pixels	
Pixel pitch	0.24 (H) × 0.24 (V)	mm	
Pixel configuration	R,G,B vertical stripe		
Unit outline dimension	69.0(W)×88.6(H)×3.4(D)	mm	【Note3-1】
Mass	42	g	
Surface hardness (Touch panel)	3H		

【Note 3-1】

Excluding FPC. For detailed measurements and tolerances, please refer to Fig. 1.

【Note5-1】 See section(7-1)-(A) and 【Note 7-8】

【Note5-2】 See section(7-1)-(A) ”※Cautions when you turn on or off the power supply”.

【Note5-3】 Selection for vertical scanning direction

U/L	Scanning direction (Pixel configuration)
High	Normal scanning (X , 1) ↑ (X , 320)
Low	Inverted scanning (X , 1) ↓ (X , 320)

【Note5-4】 Selection for horizontal scanning direction

LBR	SPL	SPR	Scanning direction (Pixel configuration)
High	Input	Output	Normal scanning (1,Y) → (240,Y)
Low	Output	Input	Inverted scanning (1,Y) ← (240,Y)

(6) Absolute Maximum Ratings

Table 4

Parameter	Symbol	Condition	Ratings	Unit	Remark
Power supply(source/Analog)	VSHA	Ta=25°C	-0.3~+7.0	V	
Power supply(source/Digital)	VSHD	Ta=25°C	-0.3~+7.0	V	
Power supply (gate)	VDD	Ta=25°C	-0.3~+35.0	V	
Power supply (gate)	VEE-VSS	Ta=25°C	-0.3~+35.0	V	
Power supply (gate)	VCC-VSS	Ta=25°C	-0.3~+7.0	V	
Power supply (gate)	VDD-VEE (VSS)	Ta=25°C	-0.3~+35.0	V	
Input voltage (Analog)	VIA	Ta=25°C	-0.3~VSHA+0.3	V	[Terminal①]
Input voltage (Digital)	VID	Ta=25°C	-0.3~VSHD+0.3	V	[Terminal②]
Operating temperature (panel surface)	T _{opp}	—	0~50	°C	【Note6-1】
Storage temperature	T _{stg}	—	-25~70	°C	【Note6-1】

[Terminal①] V0,V1,V2,V3,V4

[Terminal②] MOD,U/L,SPS,CLS,SPL,R0~R5,G0~G5,B0~B5,LP,DCLK,LBR,SPR,PS

【Note6-1】 Humidity: 95%RH Max.(at Ta ≤ 40°C). Maximum wet-bulb temperature is less than 39°C (at Ta > 40°C). Condensation of dew must be avoided.

(7) Electrical characteristics

7-1) Recommended operating conditions

A) TFT-LCD panel driving section

Table 6

GND=0V

Parameter		Symbol	Min.	Typ.	Max.	Unit	Remarks
Supply voltage for source driver (Analog)		VSHA	+4.5	+5.0	+5.5	V	
Supply voltage for source driver (Digital)		VSHD	+3.0	+3.3	+3.6	V	
Standard input voltage		V0~V4	0	—	VSHA	V	【Note 7-1】
Supply voltage for gate driver	High voltage	VDD	+14.5	+15.0	+15.5	V	
	Logic high voltage	VCC	VSS+VSHD -0.1	VSS+VSHD	VSS+VSHD +0.1	V	【Note 7-2】
	Logic low voltage	VSS	-14.3	-15.0	-15.7	V	
	Low voltage (AC)	VEEAC	—	VCOMAC	—	V _{p-p}	【Note 7-3】
	Low voltage (DC)	VEEDC	-9.5	-9.0	-8.5	V	【Note 7-3】
Input voltage for Source driver (Low)		VILS	GND	—	0.2VSHD	V	【Note 7-4】
Input voltage for Source driver (High)		VIHS	0.8VSHD	—	VSHD	V	【Note 7-4】
Input current for Source driver (Low)		IILS	—	—	30	μA	【Note 7-4】
Input current for Source driver (High)		IHS1	—	—	30	μA	【Note 7-5】
		IHS2	—	—	1200	μA	【Note 7-6】
Input voltage for Gate driver (Low)		VILG	GND	—	0.2VSHD	V	【Note 7-7】
Input voltage for Gate driver (High)		VIHG	0.8VSHD	—	VSHD	V	【Note 7-7】
Input current for Gate driver (Low)		IILG	—	—	4	μA	【Note 7-7】
Input current for Gate driver (High)		IIHG	—	—	4	μA	【Note 7-7】
Common electrode driving signal	AC component	VCOMAC	—	±2.5	±2.6	V _{p-p}	【Note 7-8】
	DC component	VCOMDC	+0.1	+1.1	+2.1	V	【Note 7-8】

※ Cautions when you turn on or off the power supply

① Turn on or off the power supply with simultaneously or the following sequence.

Turn on ... VSHD→VSHA → VSS → VCC → VEE → VDD

Turn off ... VDD → VEE → VCC → VSS →VSHA→ VSHD

② The input signal of “MOD” Terminals(Pin No.51 and No.52) must be low voltage when turning on the power supply, and it is held until more than double vertical periods after VCC is turned on completely. After then, it must be held high voltage until turning off the power supply.(Connect Pin No.51 and No.52 terminals to the same signal.)

【Note 7-1】 These are standard input voltages for gray scale. When VCOM is alternated polarity, these voltage should be alternated polarity. V0(black) is different polarity alternating signal of VCOM. V4(white) is the same polarity alternating signal of VCOM. Center voltage of each standard input voltage shift positive way for LCD characteristics (V0→V1→V2→V3→V4). This shift amount is adjusted so as to no flicker of each standard input voltage after DC bias voltage of VCOM and V0 is adjusted.

【Note 7-2】 It must be kept that $3.0V \leq (VCC-VSS) \leq 3.6V$.

【Note 7-3】 The same phase and amplitude with VCOM. VEEDC is center of VEE.

【Note 7-4】 DCLK,SPL,SPR,LBR,LP,PS,R0~R5,G0~G5 and B0~B5 terminals are applied.

【Note 7-5】 DCLK,SPL,SPR,LBR,LP,R0~R5,G0~G5 and B0~B5 terminals are applied.

【Note 7-6】 PS terminal is applied.

【Note 7-7】 MOD,CLS,SPS and U/L terminals are applied.

【Note 7-8】 VCOMAC should be alternated on VCOMDC every 1 horizontal period and 1 vertical period. VCOMDC bias is adjusted so as to minimize flicker or maximum contrast every each module .

B) Back light driving section

Table 7

Uniformity	—	—	75	85	—	%	[Note 9-8]	

* The measuring method of the optical characteristics is shown by the following figure.

* A measurement device is TOPCON luminance meter BM-5(A).(Viewing cone 1)

Measuring method (c) for optical characteristics

[Note 9-1] Viewing angle range is defined as follows.

Definition for viewing angle

[Note 9-2] Definition of contrast ratio:

The contrast ratio is defined as follows:

$$\text{Contrast ratio(CR)} = \frac{\text{Photodetector output with all pixels white(GS63)}}{\text{Photodetector output with all pixels black(GS0)}}$$

$V_{COMAC}=5.0V_{p-p}, V_0=4.0V_{p-p}, V_4=-4.0V_{p-p}$

[Note 9-3] These values are under the condition of measuring method(b) with a point light source (lighting angle = 30°).

[Note 9-4] Definition of response time:

The response time is defined as the following figure and shall be measured by switching the input signal for "black" and "white".

[Note 9-5] A measurement device is Minolta CM-2002.

[Note 9-6] Definition of reflection ratio

$$\text{Reflection ratio} = \frac{\text{Light detected level of the reflection by the LCD module}}{\text{Light detected level of the reflection by the standard white board}}$$

[Note 9-7] The White-LED life time is defined as a time when brightness not to become under 50% of the original value.(at Ta=25°C)

[Note 9-8] Definition of Uniformity

$$\text{Uniformity} = \frac{\text{Minimum brightness}}{\text{Maximum brightness}} \times 100 (\%)$$

The brightness should be measured on 9spots of the display as follows.

(10) Display quality

The display quality of the color TFT-LCD module shall be in compliance with the Incoming Inspection Standards for TFT-LCD..

(11) Mechanical characteristics

11-1) External appearance

See Fig. 1

11-2) FPC (for LCD panel) characteristics

(1) Specific connector

Hirose FH23-61S-0.3SHAW(05)

(2) Bending endurance of the bending slits portion

No line of the FPC is broken for the bending test (Bending radius=0.6mm and angle=90°) in 30 cycles.

(12) Handling Precautions

12-1) Insertion and taking out of FPCs

Be sure insert and take out of the FPC into the connector of the set after turning off the power supply on the set side.

12-2) Handling of FPCs

The FPC for LCD panel shall be bent only slit portion. The bending slit shall be bent uniformly on the whole slit portion with bending radius larger than 0.6mm, and only inner side (back side of the module). Don't bend it outer side (display surface side).

Don't give the FPCs too large force, for example, hanging the module with holding FPC.

12-3) Installation of the module

On mounting the module, be sure to fix the module on the same plane. Taking care not to warp or twist the module.

12-4) Precaution when mounting

- (1) If water droplets and oil attaches to it for a long time, discoloration and staining occurs. Wipe them off immediately.
- (2) Glass is used for the TFT-LCD panel and touch panel. If it is dropped or bumped against a hard object, it may be broken. Handle it with sufficient care.
- (3) As the CMOS IC is used in this module, pay attention to static electricity when handling it. Take a measure for grounding on the human body.

12-5) Others

- (1) The liquid-crystal is deteriorated by ultraviolet rays. Do not leave it in direct sunlight and strong ultraviolet rays for many hours.
- (2) If it is kept at a temperature below the rated storage temperature, it becomes coagulated and the panel may be broken. Also, if it is kept at a temperature above the rated storage temperature, it becomes isotropic liquid and does not return to its original state. Therefore, it is desirable to keep it at room temperature as much as possible.
- (3) If the LCD breaks, don't put internal liquid crystal into the mouth. When the liquid crystal sticks to the hands, feet and clothes, wash it out immediately.
- (4) Wipe off water drop or finger grease immediately. Long contact with water may cause discoloration or spots.
- (5) Observe general precautions for all electronic components.
- (6) VCOM must be adjusted on condition of your final product. No adjustment causes the deterioration for display quality.

(13) Reliability Test Conditions for TFT-LCD Module

Table 14

No.	Test items	Test conditions
1	High temperature storage test	Ta=+60°C 240h
2	Low temperature storage test	Ta=-20°C 240h
3	High temperature and high humidity operating test	Tp=+40°C , 95%RH 240h (But no condensation of dew)
4	High temperature operating test	Tp=+50°C 240h
5	Low temperature operating test	Tp=0°C 240h
6	Electro static discharge test	±200V · 200pF(0Ω) 1 time for each terminals
7	Shock tset	980 m/s ² , 6 ms ±X, ±Y, ±Z 3 times for each direction (JIS C0041, A-7 Condition C)
8	Vibration test	Frequency range: 10Hz~55Hz Stroke: 1.5 mm Sweep: 10Hz~55Hz X, Y, Z 2 hours for each direction (total 6 hours) (JIS C0040, A-10 Condition A)
9	Heat shock test	Ta=-25°C~+70°C / 5 cycles (1h) (1h)

【Note】 Ta = Ambient temperature, Tp = Panel temperature

【Check items】 In the standard condition, there shall be no practical problems that may affect the display function.

(14) Others

14-1) Indication of lot number

The lot number is shown on a label. Attached location is shown in Fig.1 (Outline Dimensions).

Indicated contents of the label

14-2) Used Regulation of Chemical Substances Breaking Ozone Stratum

Substances with the object of regulating : CFCS, Carbon tetrachloride, Halon

1,1,1-Trichloro ethane (Methyl chloroform)

- (a) This LCD module, Constructed part and Parts don't contain the above substances.
- (b) This LCD module, Constructed part and Parts don't contain the above substances in processes of manufacture.

14-3) If some problems arise about mentioned items in this document and other items, the user of the TFT-LCD module and Sharp will cooperate and make efforts to solve the problems with mutual respect and good will.

Caution mark is upside.

Maximum 50 units
per 1 carton.
