

RW-16 Heat-shrinkable Elastomeric Polyolefin Tubing to AMS-DTL-23053/16

Specially formulated to meet the requirements of AMS-DTL-23053/16, TE's RW-16 heat-shrinkable elastomeric polyolefin tubing provides excellent protection against fuels, hydraulic fluid and oils. It is particularly suitable for use in ground vehicle systems which require protection against mechanical abuse and fluids.

Key Features:

- Flame Retarded
- Formulated for optimum long term heat and fluid resistance
- Rugged to resist mechanical abuse
- Shrink ratio 2:1
- RoHS compliant
- Designed to be released to and comply with the requirements of AMS-DTL-23053/16
- Recommended installation shrink temperature is 175°C
- Operating temperature -75 °C to +120 °C
- · Color: Black

RW-16

Heat-shrinkable Elastomeric Polyolefin Tubing to AMS-DTL-23053/16

Typical data

Specifications/Approvals

| Military | TE specification |
|------------------|------------------|
| AMS-DTL-23053/16 | RW-2075 |

Installation

Recommended installation shrink temperature is 175°C

Ordering Information

| Black | | | | |
|--|---|---|--|--|
| Always order the largest size that will shrink snugly over the component | | | | |
| to be covered | | | | |
