		RECOMMENDATION FOR	SOLDER PROCES	SING	
harting har-flex THR angled male	connector c RoHS compliant ✓	Solder paste recommendati	on		
		— <u>'</u>		tablished lead-free SAC / SnNi solo	der but also leaded solder e.g. Snl
GENERAL INFORMATION		PCB pad plating			
No of contacts	from C to 100 poles all area primb are		solderable on lead	I-free pad surfaces like HAL, NiAu,	Immersion Sn.
No. of contacts	from 6 to 100poles, all even numbers				
Contact spacing Test Voltage	1,27mm x 1,27mm [0,050"x0,050"] 500V	Stencil recommendation			
Contact resistance	< 25 mOhm			pad area of the contact solder tine agth-to-width ratio and center point	
Insulation resistance	≥ 10x10^9Ω	The size of the solder stend	il apertures is depe	ending on the thickness of the sten	cil.
Working current acc. to IEC 60512, at 70°C, 80% derating	see derating diagram	In general, a thinner stencils will need larger apertures to result in the required volume of solder paste. The minimum required solder paste volume for the signal pins is 0,078mm³, for the hold down it is 1,179mm³.			
Working temperature range	-55°C +125°C	For example, this can be ac			he hold down it is 1,1/9mm³.
Termination technology	SMT	1 of example, this can be at	riieved with the ion		
Reflow processing temperature	min. 150s >217°C		DOD I :	Signal pins	
(acc. to ECA/IPC/JEDEC J-STD-075 Level PSL R0)	min. 30s > 240°C	Stencil thickness	PCB pad size 0,8 x 0,8 mm	proposal stencil aperture size 0,72 x 0,72 mm	calculated solder paste volume 0.078 mm³
Clearance & creepage distance	0,4mm min.			U,12 X U,12 IIIIII	U,U/O IIIIII'
Insertion force (depending on mating connector)	approximately 0,5N/contact			Hold-downs	
Withdrawal force (depending on mating connector)	approximately 0,5N/contact	Stencil thickness	PCB pad size	proposal stencil aperture size	calculated solder paste volume
, , , , , , , , , , , , , , , , , , , ,	PL1 : 500 mating cycles	150 µm	Ø0,8 mm	Ø2,3 mm	1,179 mm³
Mating cycles	PL2 : 250 mating cycles	If a stencil with lower thickne	ess shall be used in	please insure the minimum required	d solder paste volume by enlarging
RoHS - compliant	Yes	stencil aperture. Depending	on the PCB design,	, the solder depostion may protrude	e the PCB pads. But to achieve a
Leadfree	Yes			ce the cleaning interval of the sten	cil, the aperture should be smaller
Working voltage acc. to to IEC 60664-1	100V / 150V (depending on installation category)	than the PCB pad about 10% or 25µm encircling. Coplanarity of contacts All connectors are tested for coplanarity of contacts and are in the range of 6 pin to 50 pin: ≤ 0,1mm 52 pin to 68 pin: ≤ 0,12mm			
UL file acc. UL 1977	ECBT2.E102079				
UL file acc. CSA-C22.2 (for Canada)	ECBT8.E102079				
PSL level acc. ECA/IPC/JEDEC J-STD-075	PSL R0				
MSL level acc. ECA/IPC/JEDEC J-STD-020D	MSL 1			•	n to 80 pin: ≤ 0,13mm
NSULATOR MATERIAL				·	n to 100 pin: ≤ 0,15mm
Motorial	LCD (liquid an stalling polymon)	Performance level			
Material Color	LCP (liquid crystalline polymer) Black		anded for majority	of applications)	
C0101		Performance level 1 (recommended for majority of applications) Initial 250 mating cycles, 10 days gas test (25°C / 75% r.h.) using H2S 10 ppb, NO2 200 ppb, CL2 10 ppb, SO2 200 p			
III electification	LII 04 V0			ving OFO meeting evalue are evaluate	
UL classification	UL94-V0	Measurement of contact resi	stance. The remain	ling 250 maling cycles are subject	to measurement of contact resista
