Power management Driving smart power in automotive

Linear voltage regulators

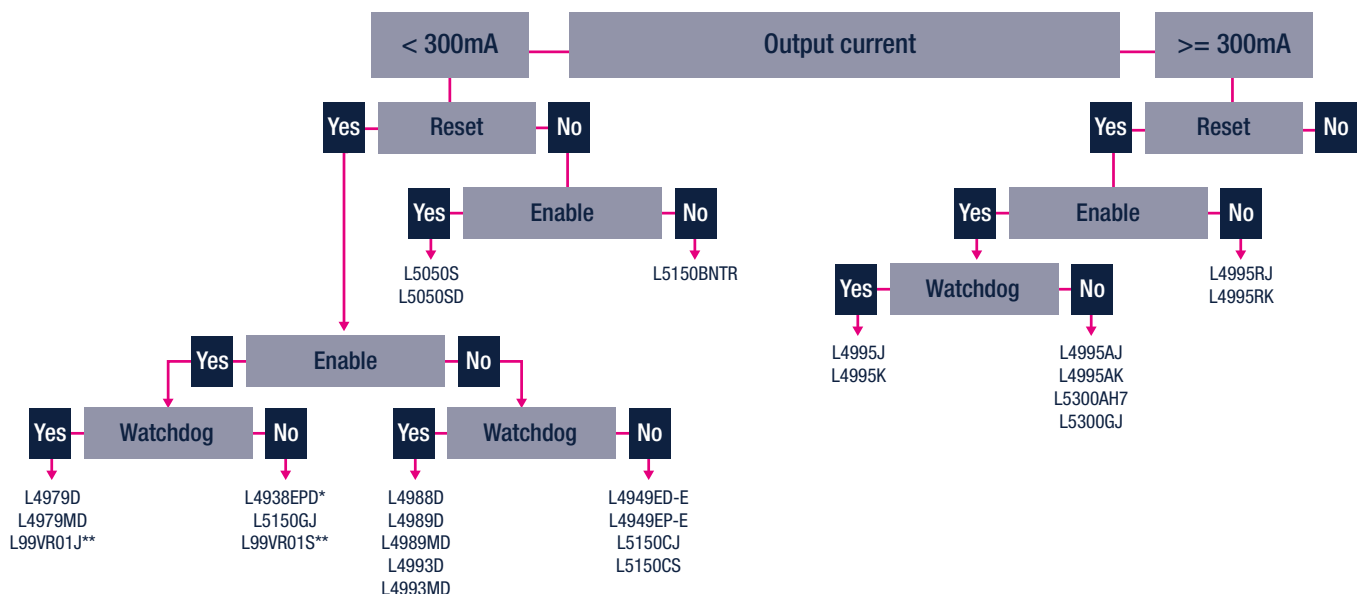

Electronic control units (ECUs), gateways, and body modules represent innovative electronic solutions for automotive applications requiring stable power supplies. ST offers a wide range of linear voltage regulators with extra features to support microprocessor operations such as watchdog, reset, and early warning functions as well as a low quiescent current during module standby that help prevent fast battery discharge when the vehicle is stopped.

- Easy implementation
- High reliability
- Limited number of external components needed
- Low dropout voltage
- Low output voltage tolerance
- Low quiescent current

- Body control module (BCM)
- Powertrain
- HVAC control module
- Door zone
- Seat positioning
- Electric park brake
- Window lift
- LED Light control
- Sunroof module
- Gearbox and more

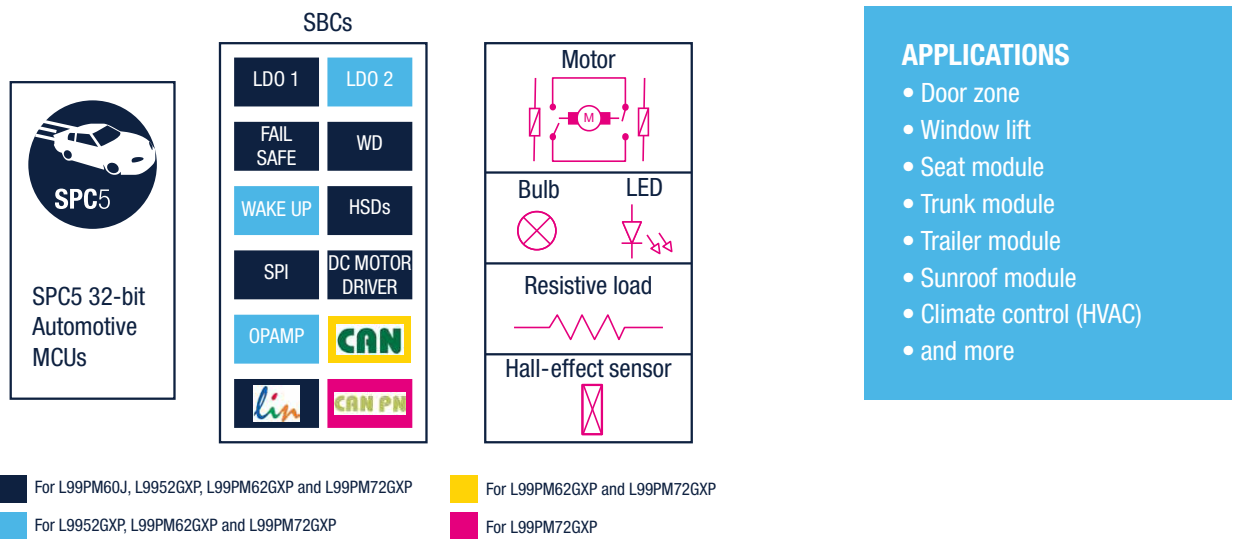

- Operating DC supply voltage : Up to 40V
- Enable input for enabling/disabling the voltage regulators
- Reset circuit sensing the output voltage down to 1 V
- Programmable reset pulse delay with external capacitor
- Programmable watchdog timer with external capacitor
- Thermal shutdown and short circuit protection
- Wide range of output currents (from 100 to 500 mA)
- Wide temperature range ($T_J = -40$ to 175°C)
- Fixed and Selectable Output Voltage solutions
- Output Over Voltage Detection
- Fast Output Discharge
- Ishort control
- Advanced Thermal Warning

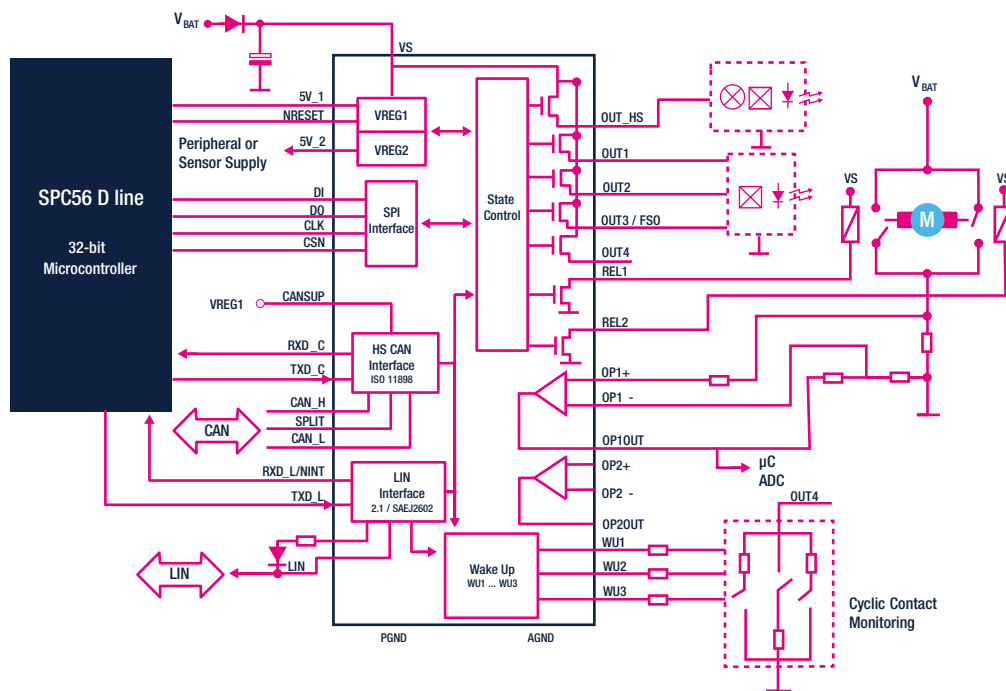

* L4938EPD dual output voltage device (see table on page 6)
 ** L99VR01x are configurable LDOs from 0.8 V to 5.0 V (see table on page 6)

Power management System Basis Chip (SBC)

Smart power management is increasingly pervading the automotive market, finding applications in ECUs, body modules, and gateways. To meet these demands, ST offers highly versatile state-of-the-art power management (System Basis Chips) to supply and drive loads and microcontrollers as well as to establish a reliable interface using dedicated communication protocols. This new power management family offers a broad selection of features and performance characteristics including a very low quiescent current and fail-safe functions.

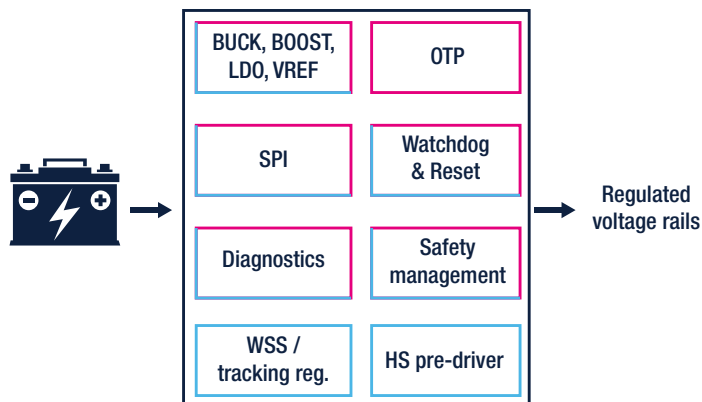

Typical Applications For L99PM62GXP and L99PM72GXP

Multi-channel power management ICs

As applications concentrate many functions in small areas and complex processors and surrounding components increase their demand on power rails and current absorption, the demand for voltage regulators with multiple outputs is increasing. Fully integrated solutions are necessary, considering that often other features like rail sequencing, voltage monitors and basic diagnostics are mandatory. ST's multi-channel voltage regulators can support the growing demand for assisted and autonomous driving applications as well as standard automotive and infotainment applications.

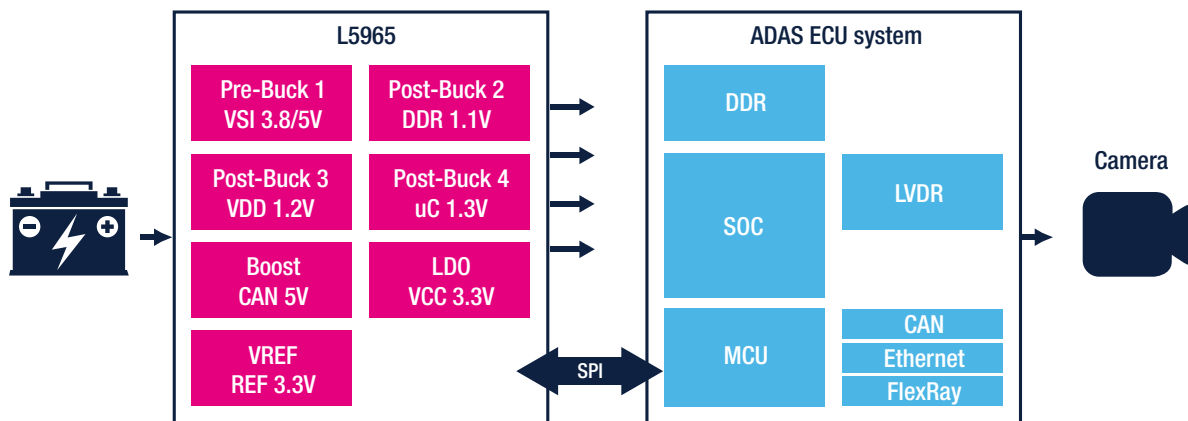

APPLICATIONS

- Camera module (front/rear/surround view)
- Radar ECU
- ADAS domain controller
- Gateway
- Infotainment (head units, sound systems)
- Telematics and more

■ L5965S, STPM066S

■ L9396

Example of ADAS domain controller application

Development tools

To help developers get the most of our voltage regulators and power management solutions, ST provides a complete set of affordable tools for evaluating the capabilities of our solutions and demonstrating their main characteristics.

Sample Kit

SAMPLES-AUTOPMIC

A collection of the most representative products in order to select the best device for a specific application

Evaluation Kits

EVAL-L99PM62-72

Dedicated evaluation board with L99PM62GXP-L99PM72GXP daughter boards, drivers & user-friendly GUI.

EVAL-L5963 and EVAL-5963Q

Evaluation boards supporting the L5963 multichannel voltage regulator

EVAL-L5965 and EVAL-STPM066S

Evaluation boards dedicated to L5965 and STPM066S multi-channel voltage regulators. Discovery board SPC582B-DIS completes the kit supporting evaluation boards programming

Order code	Evaluation tool	Components
SAMPLES-AUTOPMIC	Sample kit	L4995K (PowerSSO-24) ; L5150BN (SOT223); L5300GJ (PowerSSO-12); L99PM60J (PowerSSO-16); L99PM62GXP (PowerSSO-36); L5963-L5963Q (VFQFPN48)
EVAL-L99PM62-72	Evaluation board	L99PM62GXP (PowerSSO-36); L99PM72GXP (PowerSSO-36)
EVAL- L5965	Evaluation board	L5965 (VFQFPN-48)
EVAL-STPM066S	Evaluation board	STPM066S (VQFPN-48)
EVAL-L9001	Evaluation board	L9001 (PowerSSO-24)
EVAL- L5963	Evaluation board	L5963 (PowerSSO-36)
EVAL-L5963Q	Evaluation board	L5963 (VQFPN-48)
