а

TYPE

- 1. PACKING
  - (1) 1,500pcs are packed in one reel.
  - (2) One reel is packed in aluminum bag. The size of aluminum bag is 380(a)×400(b)mm. The size up to 380(c)mm is to zipper.
  - (3) Aluminum bag is sealed by pressured for all directions.

## 2. MARKING

The following information shall be described on a box label: ROHM Type number, Packing quantity, Luminous intensity rank, Lot number etc.

TYPE

This product was developed as a surface mount LED especially suitable for soldering. Please take care of following points when using this device.

- 1.DESIGNING OF PCB
  - As for a recommendable solder pattern, Please refer to Fig-1. The size and direction of the pad pattern depends on the condition of the PCB, So, please investigate about the adjustment thoroughly before designing.
- 2.SOLDERING (Sn-Cu, Sn-Ag-Cu, Sn-Ag-Bi-Cu) LED products do not contain reinforcement materials such as glass fillers.

Therefore, thermal stress by soldering greatly influence its reliability.

The temperature conditions for reflow soldering should therefore be set up according to the characteristic of this product. (See Fig-2) Furthermore, a sudden heating or cooling of LED cause internal stress greatly and has a possibility to break the device. Therefore, thermal gradient shall be

gradual as possible. Number of reflow process shall be max 2 times and these processes shall be performed in a row. Cooling process to normal temperature shall be required between first and second soldering process.

## **3.HANDLING AFTER MOUNTING**

In case outside force is given to the device, stress is concentrated to the jointed part between mold resin and substrate. Therefore please be careful when handling LED and PCB for there is a possibility to break the device or PCB.

# 4.WASHING

Please note the following points when washing is required after soldering.

- 4-1) WASHING SOLVENT
- Isopropyl alcohol or other alcohol solvent is recommendable. 4-2) TEMPERATURE

Below 30°C, immersion time ; within 3 minutes.

- 4-3) ULTRA SONIC WASHING Below 15 / 1 litter of solvent tub.
- 4-4) COOLING

Below 100°C within 3 minutes.

5. Erosion Gas

Utilization in erosion gas atmosphere may degenerate the plating surface which might cause deterioration of solder strength, optical characteristics, or functions.

Please take precautions against occurrence of gas from the surrounding parts on the occasion of custody, and also after mounted on circuit board.

ROHM Co., Ltd. REV. :

### **6.STORAGE**

At reflow soldering, the reliability of this product is often influenced by moisture absorption so we apply the packaging with moisture proof for better condition is use, please also note that

- 6-1) Not to be opened before using.
- 6-2) To be kept in our moisture proof packaging with some desiccant (SILICA GEL) after opening it. To be baked in case the SILICA GEL indicator changed its color from either blue to clear or green to pink.
- 6-3) Please use within 72 hours after the package was opened. (Condition at 30°C, max.70%Rh.) In case it is not used within 72 hours, please put it back into our packaging.

### 6-4) BAKING

Please bake under reel condition at  $60^{\circ}$ C,  $40 \sim 48$  hours (max.20%Rh) after un-sealing. While baking is done, the reel and emboss tape may be easily deformed. Please be careful not to give any stress.

### IN ATTENTION POINTS SOLDERING OPERATION

TYPE

This product was developed as a surface mount LED especially suitable for reflow soldering. So refrow soldering is recommended. Incase of implementing manual soldering, please take care of following points.

### **1.SOLDERING OPERATION**

### **1)SOLDER USED**

Sn-Cu, Sn-Ag-Cu, Sn-Ag-Bi-Cu

### 2)SOLDERING CONDITION

LED products do not contain reinforcement material such as a glass fillers. So thermal stress by soldering greatly influence its reliability. Please keep following points for manual soldering.

|    | ITEM           | <b>RECOMMENDED CONDITION</b>  |
|----|----------------|---|
| a) | Soldering iron | Less than 30W, top of iron less than 3mm.   |
| b) | Heating method | Condition ) Temp. of iron top less than<br>350°C within 3 sec.<br>Heating on PCB pattern, not direct to the<br>LED. (Fig-1) |
| c) | Handling after | Please handle after the part temp.  |
|    | soldering      | Goes down to room temp.   |

### 3)WASHING

- Please note the following points when washing is required after soldering.
- 3-1) WASHING SOLVENT
  - Isopropyl alcohol or other alcohol solvent is recommendable.
- 3-2) TEMPERATURE
  - Below 30°C, immersion time : within 3 minutes.
- 3-3) ULTRA SONIC WASHING

Below 15W/1 litter of solvent tub.

3-4) CURING

Below 100°C within 3 minutes.

## 4)STORAGE

At manual soldering, the reliability of this product is often influenced by moisture

absorption so we apply the packaging with moisture proof for better condition is use, please also note that 4-1) Not to be opened before using.

- 4-2) To be kept in our moisture proof packaging with some desiccant (SILICA GEL) after opening it.
- To be baked in case the SILICA GEL indicator changed its color from either blue to clear or green to pink. 4-3) STORAGE CONDITION
  - Please use products in a sort time after opening the package. In case all parts
  - are not used at the sometime, put the remaining back into ROHM package.

А

- Storage condition : (Lower than 30°C, 70% Humidity max.72 hours.)
- 4-4) BAKING CONDITION

 $40 \sim 48$  hours at 60°C, and humidity less than 20%
