PT-15 / PTC-15

15-mm carbon / cermet through-hole potentiometer

The PT-15 and PTC-15 potentiometers offer control where frequent adjustment is required. The shaftless design allows for employment of different engagement mechanisms, such as a customized shaft, a motor control or a human interface adjustment. This potentiometer can also control variable outputs including frequency, change in motor speed or volume.

KEY FEATURES

- Excellent performance (up to 3% linearity)
- Carbon or cermet resistive element
- Up to 38 mechanical detents for tactile feedback
- Up to 100.000 life cycles
- IP54 protection
- Magazine packaging for automatic insertion available
- Polyester / Alumina substrate
- Wiper positioned at initial, 50% or fully clockwise
- Loose and assembled shaft and knobs
- Linear, logarithmic and antilogarithmic tapers
- Self extinguishable plastic (UL 94V-0) available
- SPDT switch and low torque version available

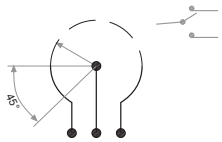
1. Rotors: "Z" adjustment only available on "H"-mounting versions. Standard color for the "T" rotor: Orange.
2. Mounting method: "V24" terminals material: brass.
3. Ω- Value: XXX - First two digits of Ω-value; XXX - Number of zeros; 000 = CM = 45° switch SPDT version



4. Tolerance: for custom tolerance please check availability: info@piher.net
5. Life: "U" only available for low-torque versions and to be studied case by case.
6. Non-flammable according to UL 94V-0: housing, rotor and shaft. PTC-15 made of non-flammable material by standard.
7. Shaft/rotor color: Without shaft: only the rotor. With shaft: only the shaft.
8. Torque: Detent option not available with low torque models.
9. Packaging: Magazine packaging available for all H and V12, V02, V21, V15 and V23 mounting.

Relative detent positions along total mechanical travel

- Standard mechanical life is 500 cycles.
- Long life versions are available upon request and have the following characteristics at T[a]: Potentiometers with 1 to 3 detents up to 10K cycles; Potentiometers with 4 and more detents up to 5K cycles
- Please consult Piher Sensing Systems if unique non-overlapping values at each detent position or LOG/ALOG tapers are required.
- Different output voltage values can be matched at each detent position (see next section).
- Detent torque can vary from 1.2 to 2.5 times the standard potentiometer torque. For all detents versions of more than 13 detents the detent torque will be 0.5 to 3.5 Ncm
- For V18 and V24 mounting detent configuration will be studied case by case.
- For more than 13 detents versions please contact Piher Sensing Systems.

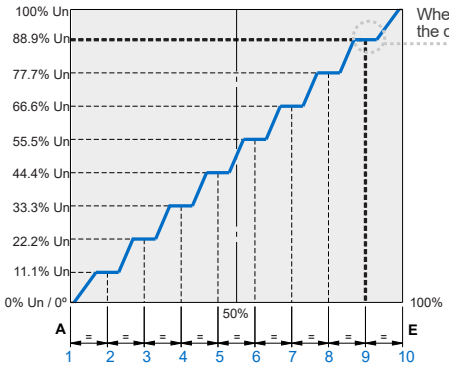
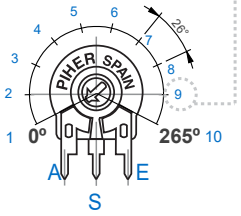
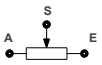
STEPPED OUTPUTS / CONSTANT VALUE ZONES



When the potentiometer's wiper is located at detent nº9, the output voltage will be 88.9% Un ±% tolerance.



Wiper position



IMPROVED REPEATABILITY

Constant value zones can be combined with strategically located mechanical detents to provide exact alignment between the electrical output (flat areas) and the mechanical detent position.
This provides clear mechanical positions that are not only repeatable, but perfectly aligned electrical outputs at each of the (detent) angles. The detents also prevent output values from changing due to vibration or accidental rotor movements.
The result is a higher level of precision in controlling lighting, temperature, motor or other electronic control systems.

Thumbwheel and shafts are delivered unassembled if not specified otherwise in part number code (W, X, Y, Z). The position of the thumbwheel Fig 4 can be indicated in part number code: Initial (default), 50% (PM) or Final (PF), shafts will be delivered at random position by default. Custom specific positions are available for all shafts and thumbwheel on request.

The plastic color can be stated in the part number.
Non flammable plastic available, if potentiometer is orderer with non-flammable plastic (UL-94V0), the shaft or knob will be delivered with non-flammable plastic.
If you wish to use your own plastic shaft/knob/actuator please contact Piher for advice about compatible materials.
*Not available in self-extinguishable plastic.

OUR ADVANTAGE

- Leading-edge innovative position sensing solutions
  - Contactless (Hall-effect and Inductive Technology)
  - Contacting (Potentiometers, Printed Electronics)
- Engineering design-in support
- All our products can be customized to fit target application and customer requirement
- Capability to move seamlessly from development to true high-volume production
- A global footprint with global engineering and commercial support
- One-stop shop not limited to position sensors (temperature, pressure, gas,...) through group collaboration
- Flexibility and entrepreneurship of a medium-sized company with the backing of Amphenol Corporation

Please always use the latest updated datasheets and 3D models published on our website.
