SKU 103030075

Up to 10 Grove Ports: I2C, UART, Digital I/O, Analog I/O
Stackable with ReSpeaker Core and ReSpeaker Mic Array
Highly Extendible with Two 2 x 8 headers

Description

GROVE EXTENSION BOARD

The Grove extension board can be stacked (connected) right onto the top of ReSpeaker Mic Array. It brings even more possibilities as you can connect various Grove sensors and actuators to extend ReSpeaker's capabilities. The board provides up to 10 Grove ports for interfacing with a range of plug-n-play Grove sensors and actuators.
