Features

ial applications	Standard
e type	Standard
nsions (W x H x D)	30 mm x 53 mm x 78.5 mm
ing distance	≤ 40 mm
ing distance tolerance	± 3 mm
ing design	Large
source	LED, RGB ¹⁾
length	470 nm, 525 nm, 625 nm
emission	Short device side
spot size	3.9 mm x 0.9 mm
spot direction	Vertical ²⁾
iving filters	None
n-in mode	1-point teach-in, 2-point teach-in, teach-in dynamic, auto mode
ut function	Light/dark switching
/ time	Adjustable
ial features	Long sensing distance
ery status	2-point teach-in
neter presettings	None
ng the key lock	Standard

Concept of operation

KTS/KTX Prime - setting the switching threshold (2-point teach-in)

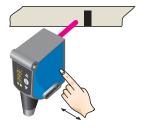

Suitable for manual positioning of the object to be detected, e.g. marks and background.

1. Position mark

When setting the contrasts to be detected, "1st" flashes. Press set button.

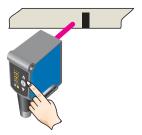

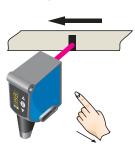

When setting the contrasts to be detected, "2nd" flashes. Press set button. The Quality of Teach is displayed.

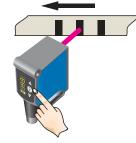

KTS/KTX Prime - Setting the switching threshold (teach-in dynamic)

Suitable for teaching in moving objects.

- 1. Position background
- 2. Move at least the mark and background using the light spot

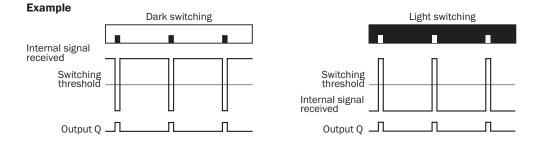

Press the Set pushbutton to start the teach-in process.

The display lights up during repeat length detection (---).

Press the Set pushbutton to end the teach-in process. The Quality of Teach is displayed.

Switching characteristics

The optimum emitted light is selected automatically (at RGB variants).

Static teach-in: light/dark setting is defined using teach-in sequence.

Dynamic teach-in: switching output active on mark, if background is longer in the field of view during the teach-in. The switching threshold is set in the center between the background and the mark.

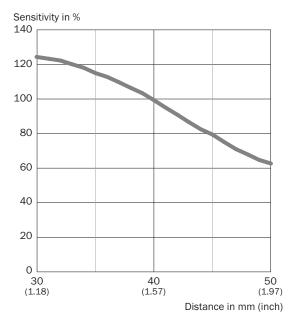

Keylock (activation and deactivation): Press and hold the "+" pushbutton > 10 s.

The Q-LED (yellow) flashes and the "Err" error message appears on the display.

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
