

# PHA Short Stroke Push-Button Switch

The push-button switch PHA with small dimensions make it the ideal choice for today's demanding switch requirements

- PC pins in the module grid of  $2.5 \times 2.5$  mm (0.0984  $\times$  0.0984). Chassis on request.
- Operating force only 170 cN (170 grams) (with 2 poles)
- Sealed, designed for flow soldering
- 2, 4 or 6 pole, double throw switching
- Optionally momentary (OA) or push-push (EE) function and interlocking (GR) in a chassis. A mixture of these different functions is possible
- Single module with chassis: see next page

## Button Removal

A button of a push-push button switch is only allowed to be removed in "OFF" (non-latching) position.

## Construction

Function	Momentary (OA), push-push (EE) or interlocking (GR)
Number of modules in a chassis	1 up to 10
Contact arrangement	2U, 4U or 6U (U = changeover)
Mode of switching	Non-shorting
Distance between button centers	10, 12.5, 15, 17.5, 20 mm (0.394, 0.492, 0.591, 0.689, 0.787 inch)
Contacts	PC pins in module grid $2.5 \times 2.5$ mm (0.0984 $\times$ 0.0984 inch)

## Electrical data

Switching power max.	3 W DC
Switching voltage max.	30 V DC
Switching current max.	100 mA DC
Dielectric strength (50 Hz/1 Min.)	500 V between open contacts 1500 V between chassis and contacts
Operating life impulse/momentary (OA)	$\cong 10^4$ operations
latching (EE)	$\cong 10^4$ operations
Contact resistance new	$\cong 20$ m $\Omega$
after $10^5$ operations	$\cong 40$ m $\Omega$
Insulation resistance	$\cong 10^{10}$ $\Omega$
Capacitance	$\cong 1.5$ pF
Contact bounce	$\cong 2$ ms
Operating speed 200 mm/s (7.87 inch/s)	

## Mechanical data

Total travel/latching travel	2.5 mm/1.5 mm (0.0984 inch/0.0591 inch)
Operating force	for 2U: 170 cN $\pm$ 50 cN (170 grams $\pm$ 50 grams) 4U: 230 cN $\pm$ 70 cN (230 grams $\pm$ 70 grams) 6U: 300 cN $\pm$ 100 cN (300 grams $\pm$ 100 grams)
Sealing	Sealed contacts

## Further data

Contact material	AG
Insulation material of housing and actuator	Thermoplastic
Max. soldering time and temperature	5 s at 260°C
Operating temperature	- 10°C to + 60°C

Ordering code: see next page.

# F and SF Push-Button Switches

The essential features of the F and SF push-button switch are the bridge contact and the many mechanical functions. The contact bridge is spring loaded which guarantees a constant pressure on the contacts.

- Up to 10 poles per module
- Various contact terminals
- Standard mounting frame with max. 23 positions
- Spacing optionally 10, 12.5, 15, 17.5 or 20 mm
- Independent interlocking groups in one bank possible
- Mechanical indicator buttons
- Configurations with illuminated push-buttons

## Mechanical functions

- OA** Momentary returning to normal "OFF" position
- EE** Push-push function
- GR** Interlocking
- GR1+ GR2** Two independent interlocking groups in one bank
- AOR** Release push-button for a bank, not latching

### Button Removal

A button of a push-push button switch is only allowed to be removed in "OFF" (non-latching) position.

## Construction

Function	Momentary (OA), push-push (EE), further functions: see table to the left
Number of buttons	1 up to 23
Contact arrangement (U = changeover contact)	Series F: 2U, 4U, 6U, 8U, 10U Series SF: 2U, 4U, 6U, 8U
Mode of switching	Non-shorting
Illumination	See: indicator and illuminated push-buttons
Spacing	10, 12.5, 15, 17.5 or 20 mm (0.394, 0.492, 0.591, 0.689 or 0.787 inch)
Terminals (see next page)	PC pins and soldering lugs or only PC pins

## Electrical data

		F-Silver	F-Gold
Switching power	F module max. AC/DC	50 VA/15 W	1 VA/300 mW
Switching voltage	F module max. AC/DC	125/30 V	50/30 V
Switching current	F module max. AC/DC	0.5/0.5 A	0.04 A/0.01 A
Carrying current max. at $\delta u = 20^\circ\text{C}$		< 2 A	< 0.5 A
Dielectric strength (50 Hz, 1 Min.)	Chassis/contact	$\geq 1500$ V	$\geq 1500$ V
	Between contacts	$\geq 1500$ V	$\geq 1500$ V
Operating life <sup>1)</sup> ("OA/EE" (24 V/200 mA) "GR")		> $10^5$ operations	> $3.5 \times 10^4$ operations
	Contact resistance	initial after operating life	Typical $\leq 10$ m $\Omega$ , max. 20 m $\Omega$ $\leq 100$ m $\Omega$
Insulation resistance		$\geq 10^9$ $\Omega$ between open contacts	$\geq 10^9$ $\Omega$ between chassis and contacts
	Capacitance at f = 10 kHz		$\leq 0.7$ pF between 2 contacts

## Mechanical data

Total travel/latching travel	4.7 mm/3.3 mm (0.185 inch/0.130 inch)
Typical F Operating Force	2U = 6.5N (650 grams) 4U = 6.5N (650 grams) 6U = 7.5N (750 grams) 8U = 9.0N (900 grams) 10U = 9.0N (900 grams)
European Typical SF Operating Force	2U = 3.5N $\pm$ 0.5N (350 grams $\pm$ 50 grams) 4U = 5N $\pm$ 1N (500 grams $\pm$ 100 grams) 6U = 6.5N $\pm$ 1N (650 grams $\pm$ 100 grams) 8U = 9N $\pm$ 1N (900 grams $\pm$ 100 grams)

## Further data

# Central Mounted F-Modules

Single modules of the F Series including mains/power modules NE18 and NE18CTII are available with central mounting.

### Standard Designs:

- ZF12  
with threaded mounting M 12 × 0.75 and a metal knurled nut.
- ZF  
with threaded mounting M 14 × 1 optional with threaded plastic front panel or with knurled nut.
- ZFA  
like ZF but with indication button FA200.
- ZFL  
like ZF but with illuminated push-buttons FLB or FLC or FLC-LED.  
ZFL: you can select among these three illumination possibilities.

US F11      Europe FA200

F24      F200

F25      FLC

# Central Mounted F-Modules

## Button styles

Series ZF12	With button FG Ø 12 mm (0.472)
Series ZF	With button F200 Ø 14 mm (0.551)
Series ZFA*	With button FA200 Ø 14 mm (0.551)
Series ZFL*	With button FLB, FLC, FLC-LED You can select among these three illumination possibilities

\* Please indicate color of button and indicator.

## Illuminated buttons

Type FLB	With filament lamp
Button shell	Black, white, grey
Cap	Red, yellow, green, white
Lamps	12 V/40 mA
Type FLC	With Neon lamp
Button shell	Black, white, grey
Cap	Red, white, green, chrome, yellow
Lamps	Neon glow lamp Z-300-GL2 <sup>1)</sup>
Type FLD	With LED
Button shell	Black, white, grey
Cap	Red, green, yellow
LED	Red, green, yellow

<sup>1)</sup> Recommended series resistors:

for 110 V 56 kΩ  
for 220 V 150 kΩ

## Lampholders

Type LZ1  
Illumination with push-button in depressed position.

Type LZ2  
Illumination independent from button position.

# F Illuminated Buttons

For F Series, Mains/Power Switches NE18 and NE18CTII

## Designation: FVR\*B (not for PVA)

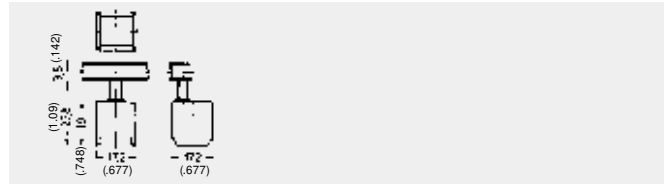

Width	17.2 mm
Height	17.2 mm
Length	19.0 mm
Pitch c min.	17.5 mm
Body	Black (BK), white (WH), grey (GY)
Reflecting cap	Red (RD), orange (OG), green (GN), blue (BU), yellow (YE), colorless-clear (CL)

## Designation: FSR\*

Width	17.4 mm
Height	17.4 mm
Length	21.0 mm
Pitch c min.	17.5 mm
Body	Black (BK), white (WH), grey (GY)
Reflecting cap	Red (RD), orange (OG), green (GN), blue (BU), yellow (YE), colorless-clear (CL)

\* Illuminated buttons with grey or black housing require an additional reflector to improve luminous efficiency.

## Dimensional Drawings

## Button order code

Color	Shell				Lens						
	Black	White	Light grey	Grey	Red	Yellow	Blue	Green	Orange	Clear/White	Smoke
Color code	01	02	04	05	03	06	07	08	12	16	18
Style code											
F21*	x	x		x	x	x	x	x	x	x	
F22*	x	x		x	x	x	x	x	x	x	x

\* Available also with front panel bezel.

## Example: F210103

An FRV style button with a black shell and a red lens.

## Lampholders

<b>Type FL1</b>	Standard version. No electrical connection to module. Lamps are illuminated by applying voltage to the solder lugs of the lampholder contacts.
<b>Type FL2</b>	For use only on modules with solder lugs on top face. One of the lampholder contacts is electrically linked with the module by means of a blade spring connecting the normally closed contact of the left side front changeover.
<b>Type FL3</b>	For use only on modules with solder lugs on top face. Both of the lampholder contacts are electrically linked with the module's normally closed contacts.

## Choice of Lamps - US

Alba Lamp			
V/mA		6/30	12/30
Recommended undervoltage		5 V	10 V
Current at undervoltage		25 mA	25 mA

## Choice of Lamps - Europe

Alba Lamp	A-810-3K	A-812-3K	A-814-3K	A-824-3K
V/mA	5/60	6/40	12/40	24/20
Recommended undervoltage	4.5 V	5 V	10 V	20 V
Current at undervoltage	57 mA	31 mA	31 mA	18 mA

The illuminated option can be used with the basic F series switches including the power switches. By the addition of a lampholder, lamp, and lens a versatile illuminated switch is obtained. Three methods of termination are available (see above).

The F series illuminated option is also available in multiple assemblies with a minimum spacing centerline of 17.5 mm (.689 inch).

In backlight push-buttons the heat of the lamps has to be considered. With intermittent or continuous operation up to 0.6 W, it is quite easy to dissipate heat. With higher rating or simultaneously burning lamps, especially in connection with the heat created by the equipment itself, it is necessary to provide efficient venting holes or air circulation.

**Note:** Power switches must have auxiliary low power contacts for illumination.

Example: NE18 2U 2A (2U = auxiliary contacts)
