

## Specification Sheet

Part Number: 156-01093

The 360 degree enclosure ensures the entire bundle is secure when being routed by this clip.

Locking tab on this clip is small enough that it will not interfere with any other portion of the wire routing, but is significant enough to allow for manual disengagement if service is needed.

The cable tie portion of this two-piece design allows for 2 wire bundles to be routed with the same piece.
