To learn more about onsemi™, please visit our website at www.onsemi.com

onsemi and ONSEMI. and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "onsemi" or its affiliates and/or subsidiaries in the United States and/or other countries. onsemi owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of onsemi product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. onsemi reserves the right to make changes at any time to any products or information herein is provided "as-is" and onsemi makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does onsemi assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using onsemi products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by onsemi. "Typical" parameters which may be provided in onsemi data sheets and/ or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. onsemi does not convey any license under any of its intellectual property rights nor the rights of others. onsemi products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use onsemi products for any such unintended or unauthorized application,

ON Semiconductor®

# FDG6332C-F085

# 20V N & P-Channel PowerTrench® MOSFETs

#### **Features**

• Q1 0.7 A, 20V.  $R_{DS(ON)} = 300 \ m\Omega \ @ \ V_{GS} = 4.5 \ V$   $R_{DS(ON)} = 400 \ m\Omega \ @ \ V_{GS} = 2.5 \ V$ 

• Q2 -0.6 A, -20V.  $R_{DS(ON)} = 420$  m $\Omega$  @  $V_{GS} = -4.5$  V  $R_{DS(ON)} = 630$  m $\Omega$  @  $V_{GS} = -2.5$  V

- · Low gate charge
- High performance trench technology for extremely low R<sub>DS(ON)</sub>
- SC70-6 package: small footprint (51% smaller than SSOT-6); low profile (1mm thick)
- Qualified to AEC Q101
- · RoHS Compliant

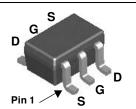

#### **General Description**

The N & P-Channel MOSFETs are produced using ON Semiconductor's advanced PowerTrench process that has been especially tailored to minimize on-state resistance and yet maintain superior switching performance.

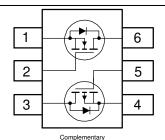

These devices have been designed to offer exceptional power dissipation in a very small footprint for applications where the bigger more expensive TSSOP-8 and SSOP-6 packages are impractical.

#### **Applications**

- DC/DC converter
- · Load switch
- · LCD display inverter

SC70-6

#### Absolute Maximum Ratings T<sub>A=25°C</sub> unless otherwise noted

2. Pulse Test: Pulse Width <  $300\mu s$ , Duty Cycle < 2.0%

<sup>1.</sup> R<sub>BJA</sub> is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins.  $R_{\rm d,IC}$  is guaranteed by design while  $R_{\rm d,IA}$  is determined by the user's board design.  $R_{\rm d,IA} = 415^{\circ} {\rm C/W}$  when mounted on a minimum pad of FR-4 PCB in a still air environment.
