# **RHD Series**

#### **FEATURES**

- · Low ESR, high ripple current resistant
- Endurance: 4000 hours at 125°C
- RoHS Compliance

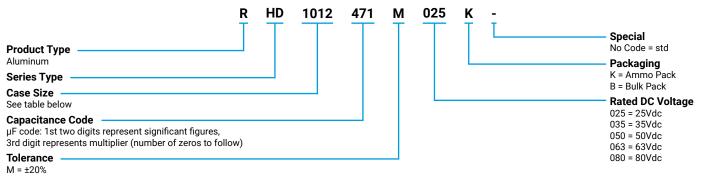

# LEAD-FREE COMPATIBLE COMPONENT

## **APPLICATIONS**

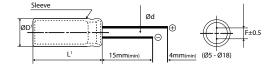

- · Industrial electronics
- · Base station equipment and power supplies

#### **HOW TO ORDER**

## **CASE DIMENSIONS** millimeters (inches)

Code	D'-0.10(0.004)+0.50(0.020)	L'-0.50(0.020)+1.00(0.039)	d±0.05 (0.002)	F±0.50 (0.020)	Typical Weight (g)
0605	6.30 (0.248)	5.00 (0.197)	0.50 (0.020)	2.50 (0.098)	0.28

#### **TECHNICAL SPECIFICATIONS**

Category Temperature Range:	-55°C to +125°C			
Capacitance Range	At 25°C, 120Hz	15μF to 470μF		
Capacitance Tolerance:	At 25°C, 120Hz	±20%		
Dissipation Factor (%)	Measurement Frequency: 120Hz at 25°C	Please see the ratings and part number reference table below		
Leakage Current:	After 2 minutes at rated working voltage at 25°C*	I = 0.01CV or 3μA, whichever is greater		

<sup>\*</sup> Note: In the case of an anomalous reading, re-measure the leakage current after following voltage treatment: Voltage treatment: DC rated voltage to be applied to the capacitors for 120 minutes at 125°C.

<sup>\*</sup> Used to denote packing type: "K" for Ammo Pack or "B" for Bulk.

All technical data relates to an ambient temperature of +25C. Capacitance and DF are measured at 120Hz, 0.5RMS with DC bias of 2.2 volts. DCL is measured at rated voltage after 2 minutes

## **RHD Series**

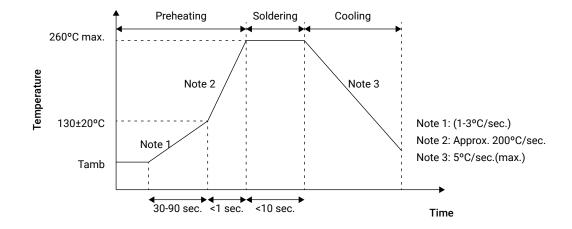

#### QUALIFICATION TABLE

Test	RHD Series (Temperature Range -55°C to +125°C						
Test	Condition	C	haracteristics				
Temperature Characteristics (Impedance Ratio at 100kHz)	Z(+125°C)/Z(+20°C)≤1.5 Z(-55°C)/Z(+20°C)≤2.0						
		Visual examination	no visible damage				
	After applying rated voltage with rated ripple current for 4000 hours at 125°C±2°C, the capacitors shall meet the following requirements at normal temperature.	ΔC/C	≦ ±30% of the initial limit				
Endurance		DF:	≤ 200% of the initial specified limit				
		ESR:	≦ 200% of the initial specified limit				
	·	DCL:	≦ Initial specified limit				
High Temperature (No-Load)	The requirements for the Endurance characteristics listed above shall be satisfied when the capacitors are restored to normal temperature after storing them for 2000 hours under no-load at 125°C±2°C.						
		Visual examination	no visible damage				
	After applying rated voltage for 2000 hours at 85°C±2°C and 85-90%RH, the capacitors shall meet the following requirements.	ΔC/C	≦ ±30% of the initial limit				
Humidity Resistance		DF:	≦ 200% of the initial specified limit				
(On-Load)		ESR:	≦ 200% of the initial specified limit				
		DCL:	≦ Initial specified limit				

#### **SOLDERING**

- 1. When soldering with a soldering iron:
  - Soldering conditions (temperature and time) should be within the limits prescribed in the catalogs or the product specifications.
  - If the terminal spacing of a capacitor does not fit the terminal hole spacing of the PC board, reform the terminals in a manner to minimize a mechanical stress into the body of the capacitor.
  - · Remove the capacitors from the PC board, after the solder is completely melted, reworking by using a soldering iron minimizes the mechanical stress to the capacitors.
  - · Do not touch the capacitor body with the hot tip of the soldering iron.
- 2. Flow Soldering:
  - Do not dip the body of a capacitor into the solder bath, only dip the terminals in. The soldering must be done on the reverse side of PC board.
  - Do not apply flux to any part of capacitors other than their terminals.
  - · Make sure the capacitors do not come into contact with any other components while soldering.
  - · Soldering conditions (preheat, solder temperature and dipping time) should be within the limits prescribed in the picture below.

# **RHD Series**

#### **STORAGE**

- Store with the temperature range between 5 to 35°C (If between 35 to 85°C, it should be less than three months), and the relative humidity of 75% without direct sunshine and store in the package states if possible.
- It is recommended that you open the bag just before use and use up as early as possible.
- · Store the capacitors in places free from water, oil or salt water or in condensation status.
- · Never store in any area filled with poisonous gases (including hydrogen sulfide, sulfurous acid, nitrous acid, chlorine and ammonia).
- Store the capacitors in places free from ozone, ultraviolet rays or radiation:

(Radial Lead Type)

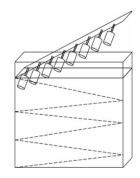

Before unseal: within 1 year after delivery

After opening: within 1 month
