

M09001

LED Driver and PMIC for TI DLP®/LCoS displays

The M09001 is a highly integrated, high efficiency driver and power management IC designed for LCoS/TI DLP® enabled displays. It provides three SPI or I2C programmable 1.2A LED/laser drivers with >90% efficient buck-boost converter, power management functionalities, including high voltage generators for DMD and LCoS panels. All of these functions are supported while operating from a single Li-Ion cell or 5V adapter. Note: DLP is a registered trademark of Texas Instruments

Features

Three programmable 1.2A common anode LED/laser drivers CSP package Li Battery and 5V adapter operation Support for both I2C and SPI interface Monitor and fault protection features Accurate LCoS and DLP panel bias generators 1.8 V and programmable 1.0/1.1/1.2/1.5/1.8 V Buck converters and 3.3/2.5V LDO regulator Integrated highly efficient buck-boost converter Current resolution down to 50uA

Applications

Head-up and Head mounted displays High current laser/LED systems LCD/LCoS/DLP portable and embedded pico projectors Multicolor LED/laser displays

Specifications

Number of Channels: 3

Part Number	Package	
M09001G-11P		
LED driver and PMIC for HD DLP/LCoS Pico		
M09001G-12	DIE	
Mobile PicoProjector 1.2A HD SOC
