THE BIG DEAL

- Small size (0.12 x 0.06 x .04")
- 7 sections
- Temperature stable
- Excellent power handling, 7W
- Hermetically sealed
- Low cost

APPLICATIONS

- Sub-harmonic rejection
- Transmitters/receivers
- Lab use

PRODUCT OVERVIEW

The HFCN-103+ is an LTCC based 7 section design, that extends the upper frequency cut-off range of the existing HFCN series to 10 GHz. Systems that previously relied on large distributed filter elements to support these lower frequencies can save space and system complexity by integrating the HFCN-103+ into new designs. These filters are offered in a EIA 1206 package size and have a typical stop band rejection of 30 dB.

KEY FEATURES

Feature	Advantages
Small Size (3.2mm x 1.6 mm)	Available in the size of typical resistors or capacitors (EIA 1706), the ultra small HFCN series integrates up to 7 high pass sections in a simple SMT chip form factor.
High Power Handling	The HFCN series can withstand up to 7W CW signal without damage making this filter ideal for use in medium power to transmit paths.
Temperature Stability	Over a 155°C operating temperature range (-55°C to +100°C), the HFCN series ceramic filters typically exhibit low pass band insertion loss variation.
High Rejection	Achieving 30dB rejection from DC-5700 MHz; the HFCN-103+ provides a versatile high pass configuration for many up converter applications.
