

# MICRO SWITCH Premium Subminiature Basic Switches

#### **DESCRIPTION**

MICRO SWITCH SX Series is a premium subminiature snap-action switch from the family of S series subminiature basic switches. Although small in size, the SX Series is rated for controlling electrical loads ranging from logic-level/computer-based circuits to limited power-duty switching (up to 7 A/250 Vac). The SX premium subminiature switch package offers gold contacts for low energy switching and bifurcated gold contacts for maximum reliability. Bifurcated contacts provide parallel redundancy within the SX switch.

A wide variety of stainless steel levers are available and when combined with the subminiature package size, can adapt the SX Series to a wide range of applications. To enhance the versatility of SX switches, the family is certified to UL, CE, CSA, ENEC, MIL-PRF-8805, FAA-PMA and UKCA for worldwide use. The SX Series is the right choice for a cost-effective premium subminiature switch package.

#### **FEATURES**

- Industry-leading life cycle of up to 10,000,000 operations
- Selection of actuation, electrical termination, and operating characteristics
- Wide temperature range of -54°C to 204°C [-65°F to 400°F]
- Built from military-grade components
- MIL-PRF-8805 qualified listings
- Available with FAA-PMA approvals for commercial aircraft applications
- Silver, gold-plated, or bifurcated gold contacts to handle a variety of electrical load requirements
- Available worldwide through Honeywell's network

#### **DIFFERENTIATION**

- Industry-leading life cycle rating reduces the need to replace switches over life in an OEM platform – reducing total system cost
- Very wide temperature range allows for years of reliable performance in the harshest of conditions
- MIL-PRF-8805 qualified listings
- Operating forces as low as 0,147 N [15 g] and differential travel as low as 0,025 mm [0.001 in] delivers consistent precise switch characteristics

#### **APPLICATIONS**

- In precision switch assemblies for commercial aircraft to monitor doors for "closed" and "locked" position
- Monitor whether landing gear is "up" or "down and locked"
- In precision switch assemblies for commercial cockpit applications for pushbuttons, toggle, or joystick assemblies
- MIL-PRF-8805 listings suitable for precision switch assemblies in military applications
- FAA-PMA approvals for commercial aircraft
- In precision switch assemblies for pressure switches and temperature switches
- In power generation, fuel level switch for gas and oil

#### **PORTFOLIO**

The MICRO SWITCH SX joins Honeywell's Subminiature Basic Swtich Series ideal for applications where space on

the equipment is at a premium. These switches may be adapted to a wide variety of applications. To view the entire product portfolio, click here.

TABLE 1. SPECIFICATIONS	
CHARACTERISTIC	PARAMETER
Differentiator	low operating force to 0,147 N [15 g] max; sensitive differential travel as low as 0,025 mm [0.001 in] max; power load switching capability to 7 A
Ampere rating	1 A to 7 A
Circuitry	SPDT, SPNO
Operating force	0.71 oz to 6 oz
Termination	quick connect, solder, pcb
Actuator	pin plunger, straight lever, roller lever, simulated roller lever, offset flag lever, crossed roller lever
Voltage	125 Vac, 250 Vac, 28 Vdc
Circuitry	SPNO, SPDT, DPDT
Agency approvals	UL, CE, UKCA, CSA, ENEC, MIL-PRF-8805, FAA-PMA
