Ammonium acetate Data Sheet

Anniomum acetate Data Sneet	
Catalog sizes	100g , Listed as 100g Ammonium acetate, AMMAC00100
	500g , Listed as 500g Ammonium acetate, AMMAC00500
	1kg, Listed as 1kg Ammonium acetate, AMMAC01000
Category	Ionic Liquids
Product specification	Colorless to off-white crystalline powder • CAS: 631-61-8
	• Purity: 98%+
	Product ID : AMMAC
	 Molecular formula : C2H7NO2
	 Molecular mass: 77.08g/mol
	• MP: 110-116C
	• FP: 133 - 139C
	• Solubility: 0.9 - 1.05 kg/L at 0C
Product description	Ammonium acetate is a white, crystalline, highly hygroscopic solid with a faint vinegar odor. It dissolves easily in cold water but decomposes in hot water.
	Potential applications of ammonium acetate include:
	acidity regulator
	 raw material in synthesis of pesticides and herbicides
	precursor in the acetamide plasticizers aunthotic actalyst
	synthetic catalystprecursor for pyridines, pyridopyrimidines, aziridines, imidazoles,
	benzoxazines, etc.
	 protein purification agent
	 mordant in dyeing fabrics
	organic deicer
	• eco-friendly solid ammonia gas carrier
