SPECIFICATIONS								
ITEM	TEST METHOD	REQUIREMENTS	QT	АТ				
Solderability	Soldered at solder temperature 245±3°C, for immersion duration 3±0.3 sec.	A new uniform coating of solder shall cover a minimum of 95% of the surface being immersed.	×	_				
Resistance to soldering heat	 Reflow soldering: peak tmp. 250°C MAX. reflow tmp. over 230°C within 60 sec. Soldering irons: tmp. 350±10°C for 5±1 sec. 	No case-deformation and loose contacts. (note 4)	×	_				

(note1)

This connector is back flip lock type, and top/bottom both contact points are available.

(note2)

Do not close the actuator before inserting FPC even after the connector is mounted onto a PCB.

Closing the actuator without FPC could make the contact gap smaller, which increases the FPC insertion force.

(note3)

If pull-up or pull-down force is exepected to be applied to the FPC, stabilize the FPC into PCB or other fixed components.

(note4)

Blisters which may be generated on the housing do not affect product performance.
