

**Impact™
Backplane Module
Installation
Press-In Tool**

**Application Tooling
Specification Sheet**

Order No. 62203-0485

FEATURES

- Tool provides uniform distribution of press force across entire pin array
- May be used as a stand-alone tool or mounted in an optional holder with other Molex press-in tools

SCOPE

Products: Impact™ Orthogonal Backplane Signal Module Assembly, 76285 Series, (6-Pair by 12 Column Assemblies). See Product List below for specific part numbers.

Product List

The following is a partial list of the product order numbers and their specifications this tool is designed to run. Updates to this list are available on www.molex.com.

76285 Series Numbers							
Guide Style	Columns	Assembly Order Number					
Open Wall	12	76285-0204	76285-0205	76285-0207	76285-0208	76285-1204	76285-1205
		76285-1207	76285-1208				
Dual End	12	76285-0224	76285-0225	76285-0227	76285-0228	76285-1224	76285-1225
		76285-1227	76285-1228				
Left End	12	76285-2204	76285-2205	76285-2207	76285-2208	76285-3204	76285-3205
		76285-3207	76285-3208	76285-6204	76285-6205	76285-6207	76285-6208
		76285-7204	76285-7205	76285-7207	76285-7208		
Right End	12	76285-4204	76285-4205	76285-4207	76285-4208	76285-5204	76285-5205
		76285-5207	76285-5208	76285-8204	76285-8205	76285-8207	76285-8208
		76285-9204	76285-9205	76285-9207	76285-9208		

Tool Setup

Depending on the number of connectors to be installed and/or the press used, this tool can be used alone or with a group of press-in tools, mounted in a 62201-95XX rail (ordered separately). See Figure 1.

Tool Installation

The 62201-95XX rail is available in a variety of lengths to accommodate multiple press-in tools.

Rail Part Number	Rail Overall Length
62201-9501	24mm (0.94 in)
62201-9502	72mm (2.83 in)
62201-9503	156mm (6.14 in)
62201-9504	216mm (8.50 in)
62201-9509	254mm (10.0 in)
62201-9511	305mm (12.0 in)

Reference: This Press-In Tool is 25.0mm (0.98in.) long.

Printed Circuit Board (PCB) Support

The Impact™ connectors require up to 3.6kg (8 lb) of force per pin to press into the PCB. To prevent excessive PCB flexure and/or damage to the PCB, a support plate is strongly recommended directly beneath the connector hole pattern.

Due to the custom nature of every application, Molex does not offer any PCB support plate. The customer must furnish their own support plate.

When creating the PCB support plate, remember to allow clearance for the connector pins as they pass through the PCB thickness.

Press Equipment Recommendations

Many types of presses can be used to install Impact™ connectors, but to assure consistent connector installation Molex recommends the following press criteria:

1. The capability to detect force variations as low as 4.5kg (10 lb) during the press-in cycle; excessive force measurements should stop the press-in cycle.
2. The rate of pressing can be regulated as low as 0.13mm (0.005 in) per second.
3. Press stroke control to within 0.25mm (0.010 in).
4. Total press stroke must be at least 19mm (0.75 in).
5. For statistical purposes, automatic collection of force and distance data.

Tool Operation

1. Insert by hand the backplane signal module assembly (s) carefully into the PCB hole pattern. Make sure the connector(s) are oriented properly by confirming the location of the #1 circuit notch with respect to the PCB layout.
2. Insert the Press-In Tool making sure that the notch in this tool is inserted into the slot on the connector housing. See Figure 2.
3. Using the application tool and an appropriate press, seat the header assembly until there is less than 0.10mm (0.004 in) clearance between the bottom of the plastic housing and the surface of the PCB. See Figure 3.

Figure 2

There should be no broken stand-offs along the perimeter of the part (an indication of over-pressing).

Figure 3

CAUTION: To prevent injury, never operate any press without the guards in place. Refer to the press manufacturer's instruction manual.

CAUTION: Molex application tooling specifications are valid only when used with Molex connectors and tooling.
