#### **General standard definitions**

For proper operation the vector network analyzer (VNA) needs a model describing the electrical behaviour of this calibration standard. The different models, units, and terms used will depend on the VNA type and they will have to be entered into the VNA. All values are based on typical geometry and plating.

 $\begin{array}{ll} \text{Offset Z}_{\circ} \, / \, \text{Impedance} \, / \, \text{Z}_{\circ} & 50 \,\, \Omega \\ \text{Offset Delay} & 23.3495 \,\, \text{ps} \\ \text{Length (electrical)} \, / \, \text{Offset Length} & 7.00 \,\, \text{mm} \\ \text{Offset Loss} & 2.20 \,\, \text{G}\Omega/\text{s} \\ \text{Loss} & 0.0089 \,\, \text{dB}/\sqrt{\text{GHz}} \end{array}$

<sup>&</sup>lt;sup>1</sup> The nominal phase is defined by the Offset Delay, the Offset Loss and the Fringing Capacitances.

<sup>&</sup>lt;sup>2</sup> Fringing Capacitances are determined individually for each open circuit and are documented in a Calibration Certificate.

<sup>&</sup>lt;sup>3</sup> Temperature range over which these specification are valid.

<sup>&</sup>lt;sup>4</sup> This range is underneath and above the operating temperature range, within the open circuit is fully functional and could be used without damage.

#### Declaration of calibration options

#### **Factory Calibration**

Standard delivery for this calibration standard includes a Factory Calibration. The Calibration Certificate issued reports individual calibration results, traceable to national / international standards. Model based standard definitions are individually optimized and reported in an Agilent/Keysight, Rohde & Schwarz and Anritsu compatible VNA format.

#### **Accredited Calibration**

Optional this calibration standard can be delivered with an Accredited Calibration (DAkkS) having the highest confidence in the traceability. The DAkkS Calibration Certificate issued reports individual calibration results in a complex format, traceable to national / international standards. Model based standard definitions are individually optimized and reported in an Agilent/Keysight, Rohde & Schwarz and Anritsu compatible VNA format as well as in a dense data set needed for data based standard definitions. The uncertainties are smaller than in a Factory Calibration.
