

Isolated EDBG Card

Isolated EDBG Card Information Sheet

Introduction

The Isolated EDBG Card is an add-on daughter card designed to program and debug the SAM/PIC32C microcontroller-based plug-in modules (PIMs) which are mounted on the following high-voltage boards:

- dsPICDEM MCHV-2 Development Board (High Voltage)- DM330023-2
- dsPICDEM MCHV-3 Development Board (High Voltage) DM330023-3

1. Installing Isolated EDBG Card

Note: Ensure that the board is de-energized before implementing the following steps.

1. Remove the protective clear acrylic (plexiglass) shield by unscrewing the eight hexagon screws.

Figure 1-1. Removing the Protective Shield on the dsPICDEM MCHV-3 Development Board

- 2. The dsPICDEM MCHV-2/3 development board is shipped along with a pre-mounted dsPIC33 motor control PIM, Pickit On Board (PKOB) debugger card and an Internal OPAMP matrix board.
 - 2.1. Replace the dsPIC33 PIM with the SAM/PIC32C Motor Control PIM required for the application.
 - 2.2. Replace the PKOB debugger card with the Isolated EDBG debugger card.
 - 2.3. Install appropriate OPAMP matrix board that is compatible with the SAM/PIC32C Motor Control PIM. Refer to the respective PIM information sheet for additional information on a compatible OPAMP matrix board.

Figure 1-2. Replacing PIM, Debugger, and Matrix Board

3. Re-install the protective clear acrylic (plexiglass) shield and secure it with eight hexagon screws. For safety reasons, it is recommended not to operate the dsPICDEM MCHV-2/3 development board without the protective clear acrylic (plexiglass) shield.

2. Using Isolated EDBG Card for Programming

To establish communication between MPLAB $^{\circ}$ X or Atmel Studio IDE, and the dsPICDEM MCHV-2/3 development board:

1. Connect a mini-USB cable between the PC running the IDE and the programming and debugging port as shown in the following figure.

Figure 2-1. dsPICDEM MCHV-3 Development Board I/O Interface

2. Energize the dsPICDEM MCHV-2/3 development board using an AC mains voltage of 90-230 AC RMS.

Figure 2-2. dsPICDEM MCHV-3 Developent Board AC Mains Interface

3. Refer to the respective IDE documentation on selecting the programmer and debugger.

The Microchip Web Site

Microchip provides online support via our web site at http://www.microchip.com/. This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- Product Support Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- General Technical Support Frequently Asked Questions (FAQ), technical support requests, online discussion groups, Microchip consultant program member listing
- Business of Microchip Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

Customer Change Notification Service

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at http://www.microchip.com/. Under "Support", click on "Customer Change Notification" and follow the registration instructions.

Customer Support

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or Field Application Engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at: http://www.microchip.com/support

Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.

 Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Legal Notice

Quality Management System Certified by DNV

ISO/TS 16949

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.
