

Taoglas® EDGE IoT Starter Kit with High Precision GNSS and RTK

Build a cloud-powered IoT application in minutes with the Taoglas® pre-certified EDGE IoT Starter Kit

- The industry's most comprehensive IoT Starter Kit
- Includes cellular, Bluetooth, onboard sensors, multi-band GNSS and RTK and cloud-based management platform
- Comes preconfigured with an active cellular data plan

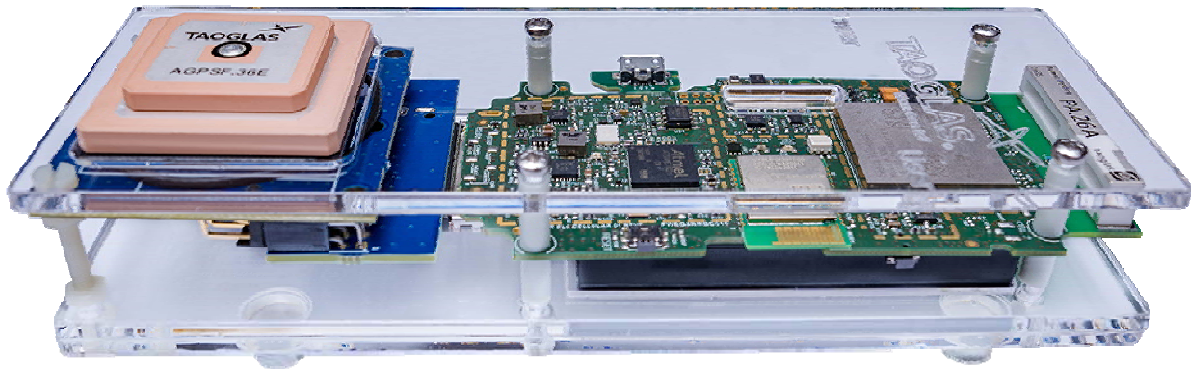

SKU: USA: ELC.10B / Europe: ELC.10L

Taoglas® EDGE IoT Star

The industry's most comprehensive IoT Starter Kit including cellular, Bluetooth, onboard sensors, multi-band GNSS and RTK, and cloud-based management platform – preconfigured with an active cellular data plan.

Features:

- Integrated onboard sensors such as temperature, humidity, accelerometer, gyroscope, magnetometer, light and air pressure
- Cellular support for LTE, 3G, 2G, Cat-M, NB-IoT to give a global coverage footprint
- Contains rechargeable battery with multi-year battery performance
- Predictive insights that drive optimization and new revenue opportunities
- Built with EDGE Insights™ cloud-based enterprise-level software platform with network, sensor, security and data management
- Completely cloud configurable EDGE hardware (no need to change device firmware)
- Easy third-party sensor and machine interfacing and integration through server-side sensor management system
- Over-the-Air (OTA) updates and device diagnostics
- Supported by a full IoT security stack, power and device management and Data-as-a-Service out of the box
- High precision GNSS with RTK capabilities allows for gathering of high precision positioning data in minutes
- Includes one month of EDGE Insights™ and cellular data subscriptions
