

Heavy-Duty Suction Cups (Pair)

Item code: IF145-023-2

DESCRIPTION

Large glass panels rarely come with handles. Use these suction cups to safely lift and remove glass and display assemblies from devices.

We specifically built these suction cups for iMac repair. For years we struggled with finding a reliable source for quality suction cups, so we bit the bullet and engineered our own. The specially formulated rubber foot sticks stronger and longer.

Includes two 2.25" diameter suction cups used for lifting display glass off Aluminum iMacs—or anything else that needs heavy duty lifting. A must-have for any iMac repair.
