

PanView iQ™ (PViQ™) TX6A™ 10Gig™ Keyed UTP Jack Module

specifications

Category 6A/Class E_A, 8-position keyed UTP jack module shall terminate unshielded twisted 4-pair, 22 – 24 AWG, 100 ohm cable without the use of a punchdown tool. The forward motion termination method shall optimize performance by maintaining cable pair geometry and eliminating conductor untwist. The jack module shall be mechanically keyed with positive keying features to prevent unintentional mating with unlike keyed or non-keyed (non-PViQ™) patch cords. The termination cap shall indicate T568A and T568B wiring schemes. PViQ™ Jack Modules shall be used with the PViQ™ System only.

key features and benefits

Positive keying features	Improves security by mechanically preventing connections with non-PViQ™ Patch Cords
Integrated block out feature	Prevents insertion of RJ11 phone plugs
100% performance tested	Confidence that each jack module will deliver the critical electrical performance requirements
Utilizes enhanced Giga-TX™ Technology	Wire cap optimizes performance by eliminating conductor untwist and reduces installation time and expense; simplifies termination and maintains conductor twists for reliable and consistent terminations
Modular	Jack modules snap in and out of PViQ™ Modular Patch Panels for easy moves, adds, and changes
True strain relief	Controls cable bend radius for long term installed performance
Individually serialized	Marked with quality control number for future traceability
Termination tools (optional)	EGJT termination tool ensures conductors are fully terminated by utilizing a smooth forward motion without impact on critical internal components for maximum reliability; TGJT tool is ideal for high volume installations

applications

Panduit's PanView iQ™ (PViQ™) System, which includes intelligent patch panels, modules and cabling, seamlessly feeds information directly into the Physical Infrastructure Manager™ (PIM™) Software Platform to provide continuous real-time patch field monitoring and visibility of physical infrastructure

connectivity for enhanced system reliability, security, and capacity management.

PViQ™ Keyed UTP Jack Modules provide mechanical differentiation and physical layer security that conventional cabling systems cannot provide.

**To designate color, add suffix BU (Blue), WH (White), IG (International Gray), or YL (Yellow).

^For lengths 1, 2, 3, 5, 10 meters, change the length designation in the part number to the desired length. For standard cable colors other than BU (Blue), substitute the BU suffix with BL (Black), RD (Red), YL (Yellow), or GR (Green). For example, the part number for a green 5-meter patch cord is PVUTP6X5MBGR.

^^For lengths 3, 5, 7, 10, 14, 20 feet, change the length designation in the part number to the desired length. For standard cable colors other than BU (Blue), substitute the BU suffix with WH (White). For example, the part number for a white 5-foot patch cord is PVQ-EU6AC5WH.

^^^For lengths 1, 2, 3, 5, 10 meters, change the length designation in the part number to the desired length. For standard cable colors other than BU (Blue), substitute the BU suffix with WH (White). For example, the part number for white 5-meter patch cord is PVQ-EU6AC5MWH.
