

SP4000 MINI SOLDER POT – 160W

Product Description

The SP4000 Mini-Solder Pot is a highly versatile lead-free compatible solder pot for benchtop use. The system is equipped with a high powered heating element allowing for fast heat up and melting of solder. The large power control knob on the front makes adjustment and setting of power easy.

Key Features

- Power control knob for easy adjustment
- Suitable for lead-free and standard processes
- Small size allows for easy handling and storage
- Powerful heating element heats up quickly
- Great for tinning wires or stripping off insulation coating
- 1.3" Pot diameter accommodates most wires

Specifications

Power Input: 110VAC

Power Consumption: 160W

Temperature Range: 392 - 752°F (200 - 400°C)

Station Dimensions: 100(w) x 100(d) x 140(h) mm

Weight: 2.43 lbs / 1.1 Kg

Solder Capacity: 40g / 10 cm³

Heating Element: Ceramic Heater
