# Microwave Gain Equalizers

50 $\Omega$  DC to 6 GHz

**EQY-SERIES** 

CASE STYLE: MC1631-1

# **The Big Deal**

- Excellent Return Loss, 20dB typ.
- Wide bandwidth, DC 6 GHz
- Small Size, 2 mm x 2 mm

## **Product Overview**

EQY series of absorptive Gain Equalizers are fabricated using highly repetitive GaAs IPD\* MMIC process incorporating resistors, capacitors and inductors having negative insertion loss slope. EQYs are available with nominal attenuation slope of 1,2,3,4,5,6,8 & 10 dB. They are packaged in tiny 2 x 2 mm 8-Lead MCLP<sup>™</sup> package.

# **Key Features**

| Feature  | Advantages  |  |
|--|---|--|
| Negative Insertion Loss Slope vs.<br>Frequency | Useful for compesating negative gain slope of amplifiers, receivers, transmitters to achieve flat gain versus frequency.  |  |
| Wide range of values<br>1,2,3,4,5,6,8 & 10 dB  | Enables circuit designer to change nominal insertion loss values without mother-<br>board redesign making the EQY series ideal for select at test application.                              |  |
| Wideband operation, DC to 6 GHz                | Supports a wide array of applications including wireless cellular, microwave communi-<br>cations, satellite, defense and aerospace, medical broadband and optic applications.               |  |
| Excellent Power Handling Capability 31/32 dBm  | Enables its use at the output of a variety of amplfiers   |  |
| Small Size and simple to use<br>(2 mm x 2 mm)  | As a single chip solution, the EQY series occupies less board space than a lumped element approach, minimizes component count and ensures repeatable performance over wide frequency range. |  |

\*GaAs IPD (Gallium Arsenide Integrated Passive Device)

# Microwave Gain Equalizer

 $50\Omega$  3dB DC to 6 GHz

#### **Product Features**

- 3.2 dB Slope
- Small Package 2 x 2 mm MCLP
- Wide Bandwidth, DC-6 GHz
- Excellent Return Loss, 20 dB typ.

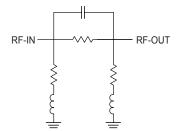

#### **Typical Applications**

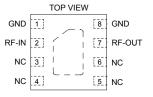

- Cellular
- PCS
- Communications
- Radar
- Defense

#### **General Description**

EQY-3-63+ is an absorptive Gain Equalizer fabricated using highly repetitive GaAs IPD MMIC process incorporating resistors, capacitors and inductors having negative insertion loss slope. EQY-3-63+ has a nominal attenuation slope of 3.2 dB and is packaged in tiny 2 x 2 mm, 8-Lead MCLP<sup>™</sup> package.

#### simplified schematic & pad description

| Function | Pad Number   | Description                      |
|----------|--------------|----------------------------------|
| RF-IN    | 2            | RF-Input pad                     |
| RF-OUT   | 7            | RF-Output pad                    |
| GND      | 1,8 & Paddle | Ground                           |
| NC       | 3-6          | No connection, ground externally |
