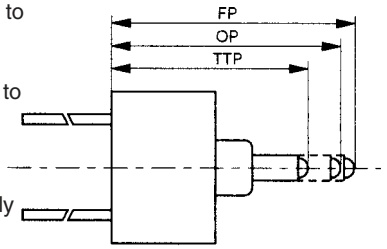
■ Mechanical Characteristics

Actuator operation (I_F = 20 mA, V_{CE} = 5 V) (see note 1)	Free position (FP): 11.4±0.3 mm Operating position (OP): 10.2 mm min. Total travel position (TTP): 9.3 mm max.
Operating force (see note 2)	0.15 N (15 gf) max.
Mechanical life expectancy	500,000 operations min. (The actuator traveling from its FP to FP via TTP is regarded as one operation.)

Note: 1. Free position (FP): The distance between the bottom of the housing to the top of the actuator without any external force imposed on the actuator.

Operating position (OP): The distance between the bottom of the housing to the top of the actuator when the actuator is pressed and the I_L becomes I_{LEAK} or less.

Total travel position (TTP): The distance between the bottom of the housing to the top of the actuator when the actuator is fully pressed.



2. Operating force: The force required to press the actuator from its FP to OP.
