ASNT5037-PQC DC-17*Gbps* Limiting Amplifier

- Broadband (DC-17*Gbps*) limiting amplifier
- Exhibits low jitter and limited temperature variation over industrial temperature range
- 100MHz of bandwidth for the amplitude adjustment tuning port
- Ideal for high speed proof-of-concept prototyping
- Fully differential CML input interfaces
- Fully differential CML output interface with adjustable SE amplitude from 0V to 1.16V
- Single +3.3V or -3.3V power supply
- Power consumption: 647*mW*
- Fabricated in SiGe for high performance, yield, and reliability
- Standard MLF/QFN 24-pin package

Offices: 310-530-9400 / Fax: 310-530-9402 www.adsantec.com

DESCRIPTION

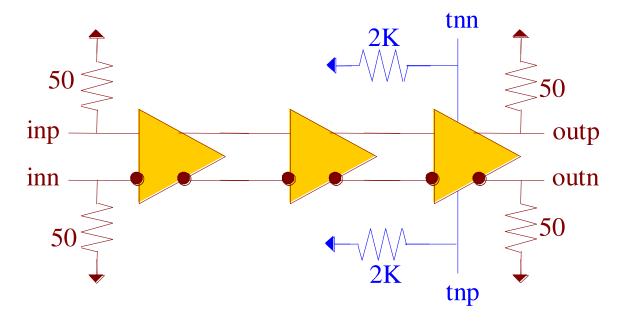

Fig. 1. Functional Block Diagram

The temperature stable ASNT5037-PQC SiGe IC provides extremely low jitter broadband signal amplitude control capability, and is intended for use in high-speed measurement / test equipment. The IC shown in Fig. 1 can process a high-speed data signal inp/inn and deliver a high-speed data output signal outp/outn with its output signal amplitude controlled by tuning ports tnp/tnn. Higher values of tnp and lower values of tnn (or higher values of the differential signal) result in higher output amplitudes.

The part's I/O's support the CML logic interface with on chip 50*Ohm* termination to vcc and may be used differentially, AC/DC coupled, single-ended, or in any combination (see also POWER SUPPLY CONFIGURATION). In the DC-coupling mode, the input signal's common mode voltage should comply with the specifications shown in ELECTRICAL CHARACTERISTICS. In the AC-coupling mode, the input termination provides the required common mode voltage automatically. The differential DC signaling mode is recommended for optimal performance.

Amplitude Control Port

The output amplitude is controlled through a wide-band differential tuning port tnp/tnn. The amplitude control diagram is shown in Fig. 2.

POWER SUPPLY CONFIGURATION

The part can operate with either negative supply (vcc = 0.0V = ground and vee = -3.3V), or positive supply (vcc = +3.3V and vee = 0.0V = ground). In case of the positive supply, all I/Os need AC termination when connected to any devices with 50Ohm termination to ground. Different PCB layouts will be needed for each different power supply combination.

All the characteristics detailed below assume vcc = 0.0V and vee = -3.3V.

ABSOLUTE MAXIMUM RATINGS

Caution: Exceeding the absolute maximum ratings shown in Table 1 may cause damage to this product and/or lead to reduced reliability. Functional performance is specified over the recommended operating conditions for power supply and temperature only. AC and DC device characteristics at or beyond the absolute maximum ratings are not assumed or implied. All min and max voltage limits are referenced to ground.

Parameter Min Max Units Supply Voltage (vee) -3.6 V**Power Consumption** 0.7 WRF Input Voltage Swing (SE) V1.0 Case Temperature ${}^{o}C$ +90 Storage Temperature -40 +100 ^{o}C Operational Humidity 98 10 % Storage Humidity 10 98 %

TERMINAL FUNCTIONS

TERMINAL			DESCRIPTION						
Name	No.	Type							
High-Speed I/Os									
inp	20	CML	Differential high-speed signal inputs with internal SE 50 <i>Ohm</i>						
inn	22	input	termination to VCC.						
outp	10	CML	Differential high-speed signal outputs with internal SE 50 <i>Ohm</i>						
outn	8	output	termination to vcc. Require external SE 50 <i>Ohm</i> termination to vcc.						
tnp	4	CML	Differential output amplitude control signal with internal 2KOhm						
tnn	14	input	termination to VCC.						
Supply and Termination Voltages									
Name		Des	cription	Pin Number					
vcc	Positive power supply. (+3.3 <i>V</i> or 0)			1, 2, 3, 5, 7, 9, 11, 13, 15, 16, 17, 19, 21, 23					
vee	Negative power supply. $(0V \text{ or } -3.3V)$			6, 12, 18, 24					

ELECTRICAL CHARACTERISTICS

PARAMETER	MIN	TYP	MAX	UNIT	COMMENTS				
General Parameters									
vee	-3.1	-3.3	-3.5	V	±6%				
vcc		0.0		V	External ground				
Ivee		196		mΑ					
Power consumption		647		mW					
Junction temperature	-40	25	125	$^{\circ}C$					
HS Input Data (inp/inn)									
Data Rate	DC		17	Gbps					
Swing	0.05		1.0	V	Differential or SE, p-p				
CM Voltage Level	vcc-0.8		VCC	V	Must match for both inputs				
HS Output Data (outp/outn)									
Data Rate	DC		17	Gbps					
Logic "1" level		vcc		V					
Logic "0" level	vcc-1.16	vcc-0	.58 vcc	V	With external 50 <i>Ohm</i> DC termination,				
Maximum swing		1.16		V	and full range of tnp/tnn control signal.				
Rise/Fall times	15	17	19	ps	20%-80%				
Output Jitter			1	ps	Peak-to-peak				
Duty cycle	45	50	55	%					
Tuning port (tnp/tnn)									
Bandwidth	DC		100	MHz					
SE voltage level	vcc-500)	VCC	mV	½ control range, the opposite pin at vcc.				
SE voltage level	vcc-100	0	VCC	mV	Full control range, the opposite pin at				
					vcc-0.5 <i>V</i> .				
Differential swing	0		1000	mV	Peak-peak. Full control range.				
CM Voltage Level	vcc-0.5		VCC	V	Must match for both inputs

PACKAGE INFORMATION

The chip die is housed in a standard 24-pin QFN package shown in Fig. 3. It is recommended that the center heat slug located on the back side of the package is soldered to the **vee** plain that is ground for the positive supply or power for the negative supply.

The part's identification label is ASNT5037-PQC. The first 8 characters of the name before the dash identify the bare die including general circuit family, fabrication technology, specific circuit type, and part version while the 3 characters after the dash represent the package's manufacturer, type, and pin out count.

This device complies with the Restriction of Hazardous Substances (RoHS) per 2011/65/EU for all ten substances.

REVISION HISTORY

Revision	Date	Changes		
5.4.2	04-2020	Updated Package Information		
5.3.2	07-2019	Updated Letterhead		
5.3.1	09-2014	Added maximum output swing value		
5.2.1	09-2014	Corrected output amplitude		
		Corrected power consumption		
		Added Amplitude Control Port description		
5.1.1	07-2014	Added description of tnp/tnn ports		
5.0.1	03-2013	Corrected title		
		Revised package pin out drawing		
		Revised functional block diagram		
		Revised description		
		Added power supply configuration		
		Added absolute maximum ratings		
		Revised terminal functions		
		Revised electrical characteristics		
		Revised package information		
		Added mechanical drawing		
_		Format correction		
4.1	03-2010			
		Added package information section		
4.0	02-2010	Revised electrical characteristics		
3.0	01-2010	Revised electrical characteristics		
2.0	12-2009	Revised electrical characteristics		
1.0	08-2009	First release
