

## Voidless Hermetically Sealed Bidirectional Transient Voltage Suppressors

Qualified to MIL-PRF-19500/516

<u>Qualified Levels:</u> JAN, JANTX, JANTXV and JANS

#### **DESCRIPTION**

This series of industry recognized voidless, hermetically sealed bidirectional Transient Voltage Suppressors (TVS) are military qualified to MIL-PRF-19500/516 and are ideal for high-reliability applications where a failure cannot be tolerated. They provide a working peak "standoff" voltage selection from 5.2 to 152 Volts with a 1500 W rating for a 10/1000 µs pulse. They are very robust in hard-glass construction and use internal Category 1 metallurgical bonds for high reliability. These devices are available as both a non-suffix part and an "A" version part involving different voltage tolerances as described in the nomenclature section. These devices are also available in a surface mount MELF package configuration.

Important: For the latest information, visit our website <a href="http://www.microsemi.com">http://www.microsemi.com</a>.

#### **FEATURES**

- High surge current and peak pulse power provides transient voltage protection for sensitive circuits
- Triple-layer passivation
- Internal "Category 1" metallurgical bonds
- Voidless hermetically sealed glass package
- JAN, JANTX, JANTXV and JANS qualified versions are available per MIL-PRF-19500/516. (See part nomenclature for all available options.)
- RoHS compliant versions available (commercial grade only)

## Also available in:

# "C" SQ-MELF Package

"C" Package

(surface mount)
1N6138US - 1N6173US

#### **APPLICATIONS / BENEFITS**

- Military and other high-reliability applications
- · Extremely robust construction
- Extensive range in working peak "standoff" voltage (V<sub>WM</sub>) from 5.2 to 152 volts
- 1500 watt peak pulse power (P<sub>PP</sub>) for a 10/1000 us test pulse
- ESD and EFT protection per IEC6100-4-2 and IEC61000-4-4 respectively
- Protection from the secondary effects of lightning per select levels in IEC61000-4-5.
- · Flexible axial-leaded mounting terminals
- Non-sensitive to ESD per MIL-STD-750 method 1020
- Inherently radiation hard as described in Microsemi "MicroNote 050"

#### **MAXIMUM RATINGS** @ T<sub>A</sub> = 25 °C unless otherwise noted

| Parameters/Test Conditions                   | Symbol              | Value       | Unit |
|--|---------------------|-------------|------|
| Junction and Storage Temperature             | $T_J$ and $T_{STG}$ | -55 to +175 | °C   |
| Thermal Resistance Junction-to-Lead (1)      | R <sub>OJL</sub>    | 20          | °C/W |
| Peak Pulse Power @ 25 °C                     | P <sub>PP</sub>     | 1500        | W    |
| Off-State Power @ T <sub>L</sub> = 75 °C (1) | P <sub>D</sub>      | 5.0         | W    |
| Off-State Power @ $T_A = 25$ °C $^{(2)}$     | P <sub>D</sub>      | 3.0         | W    |
| Impulse Repetition Rate                      | df                  | 0.01        | %    |
| Solder Temperature @ 10 s                    | T <sub>SP</sub>     | 260         | °C   |

Notes: 1. At 3/8 inch lead length from body (see figure 4).

Steady-state power ratings with reference to ambient are for PC boards where thermal resistance from
mounting point to ambient is sufficiently controlled where T<sub>OP</sub> or T<sub>J(MAX)</sub> is not exceeded (also see
figure 6).

#### **MECHANICAL and PACKAGING**

- CASE: Hermetically sealed voidless hard glass with tungsten slugs
- TERMINALS: Axial-leads are tin/lead over copper. RoHS compliant matte-tin is available on commercial grade only.
- MARKING: Body paint and part number
- POLARITY: No polarity marking for these bidirectional TVSs
- TAPE & REEL option: Standard per EIA-296. Consult factory for quantities.
- WEIGHT: Approximately 1270 milligrams
- See package dimensions on last page.

## PART NOMENCLATURE

| SYMBOLS & DEFINITIONS |  |  |  |  |
|-----------------------|--|--|--|--|
| Symbol                | Definition   |  |  |  |
| α <sub>V(BR)</sub>    | Temperature Coefficient of Breakdown Voltage: The change in breakdown voltage divided by the change in temperature that caused it expressed in %/°C or mV/°C.  |  |  |  |
| V <sub>(BR)</sub>     | Breakdown Voltage: The voltage across the device at a specified current I <sub>(BR)</sub> in the breakdown region.   |  |  |  |
| $V_{WM}$              | Working Standoff Voltage: The maximum-rated value of dc or repetitive peak positive cathode-to-anode voltage that may be continuously applied over the standard operating temperature.                         |  |  |  |
| I <sub>D</sub>        | Standby Current: The current through the device at rated stand-off voltage.  |  |  |  |
| V <sub>C</sub>        | Clamping Voltage: The voltage across the device in a region of low differential resistance during the application of an impulse current (I <sub>PP</sub> ) for a specified waveform.                           |  |  |  |
| P <sub>PP</sub>       | Peak Pulse Power. The rated random recurring peak impulse power or rated nonrepetitive peak impulse power. The impulse power is the maximum-rated value of the product of I <sub>PP</sub> and V <sub>C</sub> . |  |  |  |

## PACKAGE DIMENSIONS

|            | Dimensions |             |      |       |   |
|------------|------------|-------------|------|-------|---|
| Ltr Inches |            | Millimeters |      | Notes |   |
|            | Min        | Max         | Min  | Max   |   |
| BD         | 0.135      | 0.185       | 3.43 | 4.70  | 3 |
| BL         | 0.140      | 0.195       | 3.56 | 4.95  |   |
| LD         | 0.036      | 0.042       | 0.91 | 1.07  |   |
| LL         | 1.00       | 1.30        | 25.4 | 33.02 |   |
| L1         | -          | 0.030       | -    | 0.76  | 4 |

Schematic Symbol

#### NOTES:

- 1. Dimensions are in inches.
- 2. Millimeters are given for general information only.
- 3. Dimension BD shall be measured at the largest diameter.
- 4. Dimension L1 lead diameter uncontrolled in this area.
- 5. In accordance with ASME Y14.5M, diameters are equivalent to  $\Phi x$  symbology.
