1 Target Applications

- Hospitals, elderly care, assisted living
- Heart and respiration rate detection
- Cardiac output estimation
- Bed occupancy
- Stress and relaxation index
- Sleep quality monitoring

2 Features, functions and benefits

- Contactless measurement enables continuous monitoring without disturbing the patient
- Embedded heart and respiration rate signal processing with 1 Hz output rate
- IEEE802.11b/g/n WLAN with easy web page configuration
- Remote OTA FW upgrade capability

Supported functions are described in Section 2. Hardware detail specifications are defined in Section 4.

2.1 Interfaces

2.1.1 Magnetic switch

Magnetic switch is used to control whether the device boots up to configuration or normal mode. Usage of the switch will be discussed in the Installation Guide.

2.1.2 LED-indicators

Two green and one yellow LED indicate the operation of the product. Operation details are discussed in the Installation Guide.

2.1.3 Power supply

9 V switching power supply with 2.1/5.5 mm plug is used.

2.1.4 Firmware

Please refer to Installation Guide for firmware features.

4 Hardware Specification

4.1 Dimensions

The enclosure size is 83.7 x 40.7 x 17.6 mm³.

4.2 Waterproofness

Designed for IP55 according to IEC 60529.

4.3 Housing materials

Table 2

Item	Color	Finishing	Material
Top cover	white	texture + polishing	ABS/PC C6600 8R8D063
Bottom panel	black	texture + polishing	ABS PA757
Adaptor plate	black	texture	ABS PA757

5 Reliability

SCA11H has been verified against the following test conditions:

Table 10 Test items and conditions

Test item	Test condition
1. Temperature humidity bake (THB)	- 95RH/55°C - 9V biased - 300h - N=5
2. Low temperature storage life (LTSL)	- -40°C - 300 h - N=5
3. High temperature storage life (HTSL)	- +60°C - 150 h - N=5

Test item	Test condition
4. Temperature cycling test (TCY)	- 0°C...+55°C - 30 min dwell time - 200 cycles (c) - N=5
5. Mixed gas test	- IEC60068-2-60 method 2 - 14 days - N=3
6. Vibration test	- 10<f<55Hz, log sweep, amplitude=1.5 mm - 30 min/axis, total 1.5 hrs - N=3
7. Drop test	- 2 directional drops on each 6 sides (=12 drops) on concrete - Drop height 0.75 m - N=3
8. ESD (HBM)	- Air discharge ±6 kV - Contact discharge ±3 kV - N=3
9. Water and dust proofness (IP55)	- 6.3 mm nozzle, 3 m distance, 12.5 l/min, 30 kPa water pressure - N=3 - IEC 60529 dust, 0.1 - 0.3 kPa underpressure, 2 h - N=3

6 AC Adapter

For detailed information, please refer to AC adapter product specification 1629.

7 Packaging and Labeling

8 Storage Conditions

- The product shall be stored without opening the packing.
- The outer boxes including the products and gift boxes shall not be stored outdoor.
- The product shall not be stored in the place where the product may become corroded e.g. due to corrosive gas (Cl₂, NH₃, SO₂, Nox, etc.).
- Any excess mechanical shock shall not be applied in order not to damage the packing materials and product itself.

9 Handling Condition

Be careful in handling or transporting products because excessive stress or mechanical shock may damage products.

Warranty is void if device is opened.

10 Cleaning

See instructions in Installation Guide.

11 Operational Environment Conditions

Products are designed to work for electronic products under normal environmental conditions (ambient temperature, humidity and pressure). Therefore, products have no problems to be used under the similar conditions to the above-mentioned. However, if products are used under the following circumstances, it may damage products and leakage of electricity and abnormal temperature may occur.

- In an atmosphere containing corrosive gas (Cl₂, NH₃, SO_x, NO_x etc.).
- In an atmosphere containing combustible and volatile gases.

If there are possibilities for products to be used under the preceding clause, consult with Murata before actual use.

12 Note

Please make sure that our product SCA11H has been evaluated and confirmed against your specifications. Please also note that our product SCA11H has not been qualified for medical or similar use where it might directly or indirectly cause damage to the third party's life, body or property.

All the items and parameters in this product specification have been prescribed on the premise that our product is used for the purpose, under the condition and in the environment agreed upon between you and us. You are requested not to use our product deviating from such agreement.

We consider it is not appropriate to include other terms and conditions for transaction warranty in your product specifications, drawings or other technical documents. Therefore, even if your original part of this product specification includes such terms and conditions as warranty clause, product liability clause, or intellectual property infringement liability clause, we are not able to accept such terms and conditions in our product specification unless they are based on the governmental regulation and we have agreed in a separate contract. We would like you to discuss them when negotiating the contract.

13 Document Change Control

Rev.	Date	Change Description
1	01-Sep-15	Document moved to new control system and template, table 2, 4 and 10 updated, section 4.2 updated, reference in 4.7 updated, section 6 updated.
2	04-Dec-15	Updated table 10. Updated product codes. Updated section 9.
