Universal Mounting Bracket

The Parallax Universal Shaped Mounting Bracket can be used for all types of projects that require components to be mounted. The straight shape of the bracket can be configured to work on several surfaces and chassis. It has two designated holes and includes two slide slots for adjusting to length for those hard to fit requirements. This bracket is perfect for mounting LCDs, Ping sensors, and other various sensors.

Features:

- Versatile slots for mounting.

Compatible with These Kits:

- Boe-Bot Robot Kit - Serial (with USB adapter and cable)
- SumoBot Robot
