AT10006B-30-U

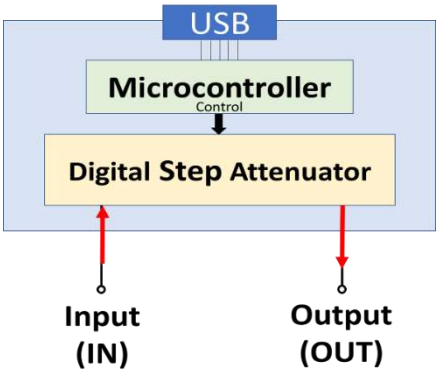
Programmable Attenuator 200 - 6000 MHz
31.75 dB, 0.25 dB Step

RoHS Compliant

Insertion Loss Compensated

No Extra Insertion Loss

Setting Attenuation = Actual Attenuation



Electrical Schematic

Note: When the "compensate I.L." is set "ON", and the frequency and wanted attenuation value is specified, the attenuator will automatically calculate the required additional attenuation value according to the corresponding insertion loss. The final attenuation value will be very close to wanted attenuation value.
