

# Soldering Station with LCD Display ESD Safe 400 Series

LCD Display and Temperature Control

Deluxe Iron Compartment  
With Sponge and Brass Coil  
Tip Cleaners

Standard Pointed Tip Included

SOLDERING STATION WITH LCD DISPLAY ESD SAFE 400 SERIES	
<b>RATED VOLTAGE RANGE</b>	110-130V
<b>RATED POWER INPUT</b>	60W
<b>TEMPERATURE RANGE</b>	160-480°C (320-900°F)
<b>TIP</b>	Standard Pointed Tip
<b>POWER SOURCE</b>	Corded Electrical
<b>WEIGHT</b>	2.08 (4.6 lbs.)

## Designed For Lead-Free & General Purpose Soldering

Aven's powerful new soldering station with LCD display has been designed for a wide temperature range (from 160 - 480 C) and is ideal for general purpose soldering as well as specialized lead-free soldering applications. The soldering iron tool heats rapidly from room temperature to 350C in as little as 30 seconds. With its high-quality sensor the heat exchange system guarantees precise temperature control at the soldering tip. This digital temperature controlled soldering station includes a strong, deluxe iron compartment that features a pull out sponge tray and coiled brass tip cleaner that is hard enough to remove debris from the solder tip, yet soft enough not to damage it.
