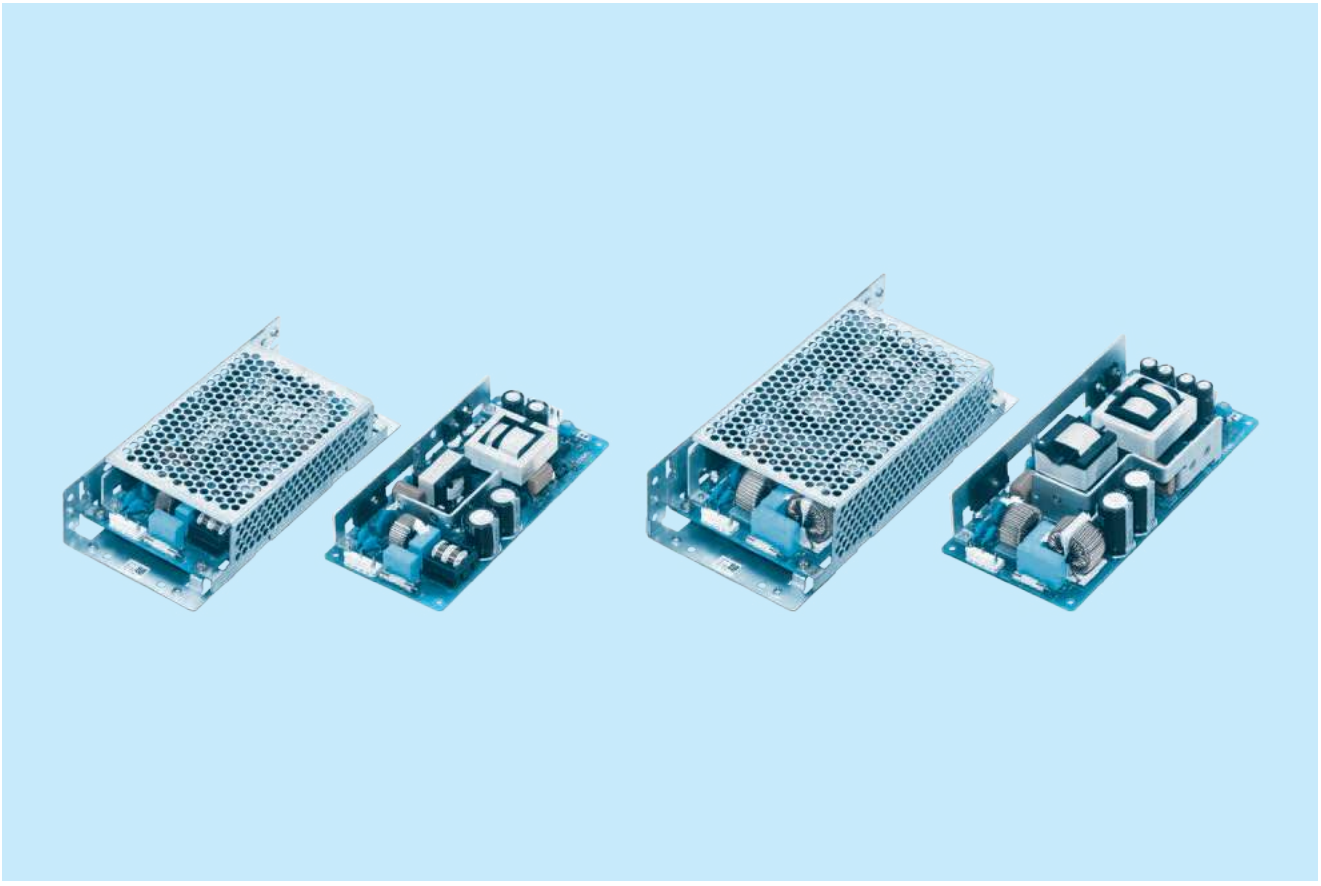
Power Factor Correction | World wide | Safety Approvals | EMI | Inrush current limiting | OCP | OVP | Cost Effective | Rugged PCB type

LHP-series



Feature

OVC III
High power & high peak power
High efficiency
Low profile
Active Power factor correction
Harmonic attenuator (Complies with IEC61000-3-2)
Universal input (85 - 264 VAC)
Built-in inrush current, over current, over voltage protection

Safety agency approvals

UL62368-1, C-UL (equivalent to CAN/CSA-C22.2 No.62368-1), EN62368-1
EN62477-1 (OVC III)
Complies with DEN-AN
UL508 (Optional)

5-year warranty (refer to Instruction Manual)

CE marking

Low Voltage Directive
RoHS Directive

UKCA marking

Electrical Equipment Safety Regulations
RoHS Regulations

EMI

Complies with FCC-B, CISPR11-B, CISPR32-B, EN55011-B, EN55032-B, VCCI-B

EMS Compliance : EN61204-3, EN61000-6-2

EN61000-4-2
EN61000-4-3
EN61000-4-4
EN61000-4-5
EN61000-4-6
EN61000-4-8
EN61000-4-11

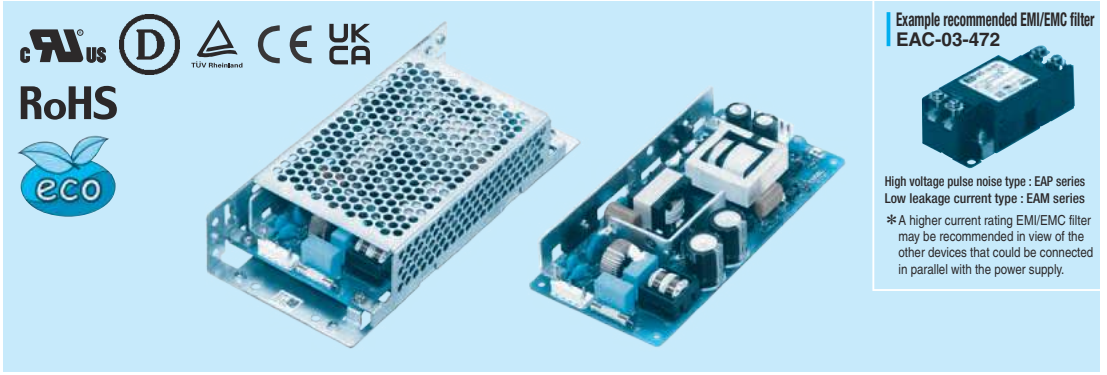
Ordering information

LH ① P ② 150 ③ F ④ -□□ ⑤ -□ ⑥



Example recommended EMI/EMC filter
EAC-03-472

High voltage pulse noise type : EAP series
Low leakage current type : EAM series

＊A higher current rating EMI/EMC filter may be recommended in view of the other devices that could be connected in parallel with the power supply.

①Series name
②Single output
③Output wattage
④Universal input
⑤Output voltage
⑥Optional ＊1
C : with Coating
G : Low leakage current
J4 : EP(TE Connectivity) connector type
R□ : with Remote ON/OFF
S : with Chassis
SN : with Chassis & cover
T : Terminal block type
T4 : Push-in Terminal Block Type
T5 : UL508
U1 : Can be attached the external capacitor unit

For option details, refer to instruction manual 7.1.

This power supply is manufactured by SMD technology. The stress to PCB like twisting or bending causes the defect of the unit, so handle the unit with care.
＊Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

	COOLING METHOD ＊8		Convection / Forced air (Requires external fan) (Refer to “Derating”)				

＊1 The listed optios may affect the published standard specifications. Please contact us for detailed product specifications and safety approvals.
＊2 Peak loading for 10sec. And Duty 40% max, refer to Instruction Manual 6. In detail. ( ) means peak current. There is a possibility that an internal device is damaged when the specification is exceeded.
＊3 The current of input surge to a built-in EMI/EMS Filter (0.2ms or less) is excluded.
＊4 In the case of dynamic fluctuations, the specifications may not be met.
＊5 Measured by 20MHz oscilloscope or Ripple-Noise meter (Equivalent to KEISOKU-GIKEN : RM104). Please refer to the instruction manual 1.7.
＊6 Drift is the change in DC output for an eight hour period after a half-hour warm-up at 25℃, with the input voltage held constant at the rated input/output.
＊7 Applicable when Remote ON/OFF (optional) is added.
＊8 Derating required.For use with DC input is Refer to Instruction Manual 1.1 and 7.1.
＊9 Please contact us about another class.
＊ To meet the specification, do not operate overload conditon.
＊ Parallel operation is not possible.
＊ Sound noise may be generated by power supply in case of pulse load.
＊ Burst operation may occur when the load factor is 10% or less.

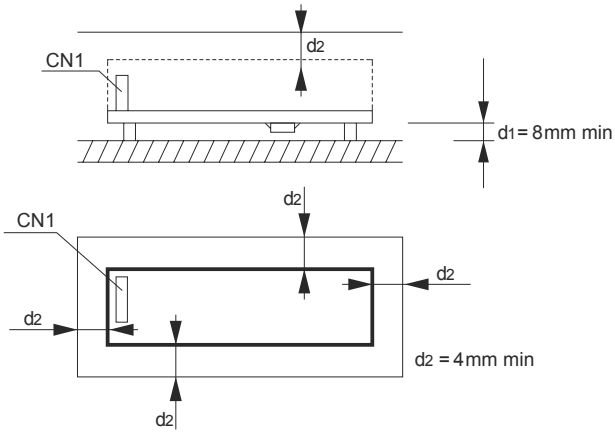
Assembling and Installation Method

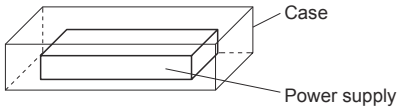
Installation method

■This power supply is manufactured by SMD technology. Do not touch any SMD components on the unit. Be especially careful when handling.

■If using a metal chassis, keep proper insulation between the component and metal chassis, use the spacer of 8mm or more between bottom of power supply and metal chassis.
If d1 and/or d2 are less than the value mentioned in right figure, insert an insulating sheet with reinforced insulation between the power supply unit and metal chassis.
The following distance is not satisfactory for cooling condition. Please refer to “Derating” and Instruction Manual 3 for cooling method.

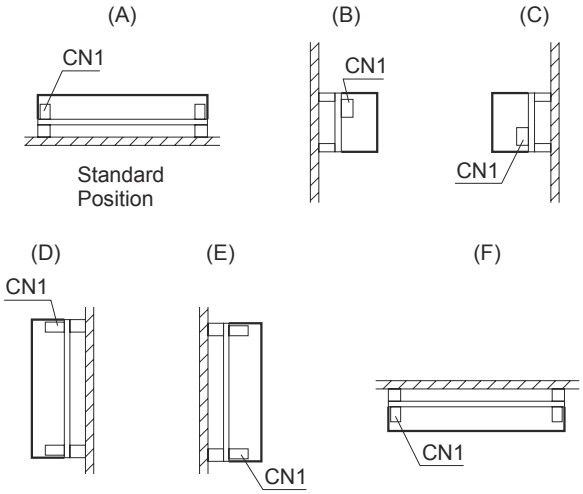


■When used in a sealed case there is the possibility of insufficient cooling of the power supply – see right figure.
Please check and confirm that temperature of point ① and point ② stay below the limits given in the Instruction Manual 3.



■Installation method shown right is possible.

■In optional -SN, Method (F) is not available with convection cooling. If method (F) is used, use with forced air cooling or derate temperature / load. For more details, please contact us.



Mounting screw

■The mounting screw should be ϕ3mm. The hatched area shows the allowance of metal parts for mounting.

■If mounting metallic fittings on the board surface, ensure there is no contact with components.

■This product uses SMD technology. Please avoid the PCB installation method which includes the twisting stress or the bending stress.

Derating

Derating curve for input voltage
