

Data brief

Breakout board embedding the VL53L4CD Time-of-Flight high-accuracy proximity sensor

- Time-of-Flight crozing sensor with high accuracy hased on FlightSenseTM technology Prezions hounts for easy and
- Residual boards for easy and last prototyping
 Compatible with X-NUCLEO-33L4A1

Supergrammated ingroverments by this exact above upper appearable being of the exact of the individual set the exist of the exact of the individual set of the exact of the work of the order.

ST part number: SATEL-VLS3L4CD

your st con

Features

- VL53L4CD Time-of-Flight high-accuracy proximity sensor
- High-performance proximity ranging, independent of the target size and reflectance
- From 0 to 1300 mm with full field of view (FoW)
- Short distance linearity down to 1 mm
- Divisible board that can be used as a mini-PCB breakout board, easy to integrate into the customer's device
- · Two breakout boards available in the package
- Compatible with X-NUCLEO-53L4A1

Description

The SATEL-VL53L4CD package includes two breakout boards, which can be easily integrated into the customer's devices.

The PCB section that embeds the VL53L4CD module is perforated. The developers can then break off the mini-PCB and use it in a 3.3 V supply application via flying wires.

This makes it easier to integrate the SATEL-VL53L4CD breakout boards into the development and evaluation devices thanks to their small size.

Product summary		
Breakout board embedding the VL53L4CD Time-of-Flight high-accuracy proximity sensor	SATEL-VL53L4CD	
Time-of-Flight high-accuracy proximity sensor expansion board based on the VL53L4CD for STM32 Nucleo	X-NUCLEO-53L4A1	
Time-of-Flight high-accuracy proximity sensor	VL53L4CD	
Applications	Personal Electronics - Audio and Video	
	Gaming and Drones	
	Virtual - Augmented Reality	
	Wearable	

1 Breakout boards

You can break the breakout boards along the perforations to use the mini-PCB.

This setup is easier to integrate into a customer's device thanks to its small form factor.

You can plug the VL53L4CD breakout boards directly onto the X-NUCLEO-53L4A1 expansion board through two six-pin connectors (Figure 2), or connect them to the board through flying wires (Figure 3).
