

Keyfob Single Button RF Remote Control - 315MHz

PRODUT ID: 1392

• Description

This single button keyfob remote goes with our three basic 315MHz RF receiver modules. It will work with all of them, sending out one command that matches with the second output on the receiver. Its small and light weight and will work up to 25 feet away depending on line-of-sight and obstructions. Since this is just a transmitter, if you have multiple receivers, it will turn all of them on and off at the same time (there is no sub-addressing)

A matching RF receiver is not included, you'll need to purchase one in addition!

• **Technical Details**

Weight: 21.22g

Uses two CR2016 coin cells

Based on the PT2262
