

DREMEL®

4000-2/30 High Performance Rotary Tool Kit

Model # 4000-2/30

Product Specifications

The Dremel 4000 variable-speed rotary tool kit offers the highest performance and most versatility of all Dremel rotary tools. The increased strength of its motor and electronic feedback circuitry enables consistent performance at all speed levels. Ergonomics include a slim design that provides a 360-degree grip zone for added comfort and control. The Dremel 4000 can use all existing Dremel rotary tool accessories and attachments, as well as high-performance attachments, so you can do more with just one tool. Two year warranty.

- High-performance motor for maximum performance at all speeds
- Electronic feedback for consistent speed under load
- Variable speed for greater versatility
- Can be used with all Dremel rotary tool attachments and accessories
