

mikroLab for dsPIC L

MIKROE-2009

OVERVIEW

Description

mikroLab for dsPIC delivers more than it promises. It's a full development solution **not only for dsPIC30, but also for PIC24 MCUs** – essentially covering Microchip's 16-bit PIC portfolio in the high pin count realm. The mikroC compiler license included in the kit supports more than 425 chips, while the **EasyPIC Fusion v7** board also supports PIC32 MCUs (giving you more possibilities for the future).

About dsPIC33/PIC24

16-bit PICs lie in the middle-ground, providing an **easy way to upgrade from 8-bit PICs**, but a **more cost-effective solution compared to 32-bit PICs**. The diverse MCU offering includes eXtreme Low Power MCUs and high performance digital signal controllers.

What's in the box

[EasyPIC Fusion v7 development board](#)

MCU card with dsPIC33EP512MU810

MCU card with PIC24EP512GU810

mikroC for dsPIC (installation on USB flash + license activation card)

FREE BONUS: Visual TFT (installation on USB flash + license activation card)
