

TINYZERO BASIC KIT ASK1015

This **TinyZero Basic Kit** has the bare essentials to get going with the TinyZero!

This kit includes the following items:

- **TinyZero Processor Board w/ accelerometer option** - Runs your Arduino programs on a fast 32-bit ARM processor with 256KB of flash memory.
- **TinyShield Proto board (without top connector)** - Used to connect to external circuitry if needed.
- **150 mAh Rechargeable Lithium Polymer Battery** - Used to power your TinyDuino projects.

*To learn more about the **TinyDuino Platform**, click [here](#)*

NOTES

- The Lithium Polymer battery will recharge when the TinyZero is plugged in and powered from USB.
- A micro USB cable is not included in the kit.
