## QUICK START GUIDE

The demo board is intended to implement the synchronous rectifier in an LLC resonant converter with center-tap secondary winding.

How to use EV6925-S-00A evaluation board replace diode rectification:

1. Remove the diodes rectifiers from the board as the Fig.3 shows.
2. Connect the center-tap and other two secondary windings of transformer as the Fig.4 shows.
3. Connect the Vout and GND pins on MP6925 demo board as the Fig. 4 shows.
4. Turn the power supply on. The IC will start up automatically.
