AB-EZPC-96

High Power Current Regulator with Bias Voltage Rectification

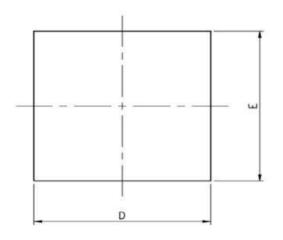

Features

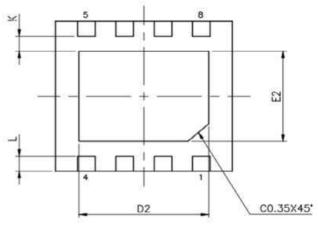

- DFN3030 package (MSOP available)
- Built-in rectification circuit
- Accurate constant current
- Over Current Protection (OCP)
- Over temperature protection (OTP)

Description

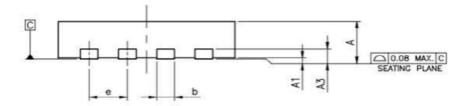

AB-EZPC series is a constant current regulator with built-in bias voltage rectification circuit. It is designed to maintain constant current and hence constant luminance for DC powered LED lighting applications. AB-EZPC series rectifies power input for the LED string to operate regardless of the polarity of the bias voltage. Additionally, to ensure system reliability, AB-EZPC series is built with thermal protection function (OTP). The AB-EZPC series is available in 3030 DFN & MSOP 8 PIN packages.
