

Order Number
213069-0500

Application Tooling Specification

FEATURES

- Applicator designed to industry-standard mounting and 135.80mm (5.346") shut height
- Quick setup time; plus, the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of 0.015mm (.0006") for conductor crimp height and 0.025mm (.001") for insulation height
- Fine adjustment of the bend is achieved using the bend control adjust dial
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other
- Directly adapts to most automatic wire processing machines

SCOPE

Products: Squba 1.8mm Plug WTW Crimp Terminals: 22-24 AWG.

Terminal Series No.	Terminal Order No.	Wire Size		Insulation Diameter		Strip Length	
		AWG	mm ²	mm	In.	mm	In.
204226	204226-1001	22-24	—	0.95-1.40	.037-.055	3.50	.138

CAUTION: Lubrication must be used to prevent terminals from sticking in the conductor punch. Use 63801-7240 oiler or equivalent.

DEFINITION OF TERMS

CRIMP SPECIFICATIONS

Refer to the following crimp specifications:

Feature	Requirement				
1. Bend Up	3° Max				
2. Bend Down	3° Max				
3. Twist	3° Max				
4. Roll	3° Max				
5. Rear Bell Mouth	0.30-0.60mm (.012-.024")				
6. Front Bell Mouth	Not Applicable				
7. Cut-Off Tab**	0.25mm (.010") Max				
8. Conductor Brush	0.30-0.70mm (.012-.028") Max				
9. Conductor Crimp Height	Terminal Series No.	Wire Type	Wire Size	Crimp Height	
	204226	UL1061	22 AWG	0.67-0.71mm	.026-.028 in.
			24 AWG	0.63-0.67mm	.025-.026 in.
10. Conductor Crimp Width	1.20mm (.047")				
Pull Force	Terminal Series No.	Wire Type	Wire Size	Minimum Force	
	204226	UL1061	22 AWG	35.6 N	8 lb.
			24 AWG	22.3 N	5 lb.
	To be measured with no influence from the insulation crimp.				
11. Insulation Crimp Height	Terminal Series No.	Wire Type	Wire Size	Crimp Height (Ref)	
	204226	UL1061	22 AWG	1.25mm	.049 in.
			24 AWG	1.20mm	.047 in.
12. Insulation Crimp Width	1.30mm (.051")				
13. Conductor Anvil Flash	0.10mm (.004") Max				

**** See Applicator Notes and Terminal Feed Notes on page 3.**

NOTES

Applicator Notes

The 204226 series terminals are extremely delicate. This section lists suggestions to help ensure smooth operation of this applicator:

- **Caution:** The wire stop on this applicator (Order Number 63443-0090) assists in removing terminals that stick into the crimp tooling and should not be readjusted.
- Lubrication must be used to prevent terminals from sticking in the conductor punch. See General Notes below.
- The terminal feed and track may need cleaning every 10,000 cycles to reduce jamming.

****** Generally, a short or "zero" cut-off tab is desired. However, the tab on these terminals is extremely delicate. By maintaining a cut-off tab length of approximately 0.08-0.15mm, the terminals should feed through the cut-off plunger with minimal bending or jamming.

Terminal Feed Notes

Feed jams may occur as a result of damaged carrier strip pilot holes. This damage can occur because of the following:

- Dirt buildup in the track
- Press speed is set too fast

Specification Notes

- It is very important that the brush length is consistently within specification for this sealed connector system to work properly.

General Notes

1. Molex recommends that an extra perishable tooling kit be maintained at your facility.
2. Verify tooling alignment by hand cycling the press and applicator before crimping under power. Check that all screws are tight.
3. Slugs, terminals, dirt and oil should be kept clear of the work area.
4. Wear safety glasses at all times.
5. For recommended maintenance, refer to the FA2 manual (TM-638080200).
6. Molex recommends crimping standard copper wire only.
7. Lubrication must be used to prevent terminals from sticking in the conductor punch. Use 63801-7240 oiler or equivalent. The oiler must be positioned so that the terminals remain straight on the carrier strip.

PARTS LIST

Applicator 213069-0500				
Item	Order No.	Engineering No.	Description	Quantity
Perishable Tooling				
	213069-0570	213069-0570	Tool Kit (All "Y" Items)	REF

ASSEMBLY DRAWING

Figure 1

FACTORY SETTINGS

Feed Pawl Assembly

The FA2 applicator number 213069-0500 ships with the following factory settings. See Figure 2:

- The feed pawl shaft and M3 screw that holds the feed pawl spring are in position 3.
- The pin is in position B.

Note

Figure 2

This information is included as a reference only. Each applicator is configured and tested by Molex prior to shipping, and the above settings were used to produce the included sample crimps.

Third Dial/Ram Assembly

○ Indicates item number on the Parts List and Assembly Drawing

Mounting Datum Location

This applicator was assembled and tested by Molex with the mounting datum in the location shown in Figure 3. Do not remove the mounting datum.

Figure 3

WARNINGS

CAUTION: This applicator must be installed in a press with a standard shut height of 135.80mm (5.346"). Tooling damage could result at a lower setting.

CAUTION: To prevent injury, never operate this applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

CAUTION: Molex tooling crimp specifications are valid only when used with Molex terminals and tooling manufactured by Molex and sold by Molex or authorized distributors ("Molex Tooling"). When using tooling other than Molex Tooling with Molex-specific connector systems listed in our ATS documents, the Molex Tooling qualification does not apply, and the responsibility for full qualification of the connector system is that of the customer. Molex accepts no liability for connector performance or tooling support where tooling other than Molex Tooling is used or where Molex Tooling is modified.
