4-Zone FSR® and USB Microcontroller

## Features and Benefits

- Low current use
- Fully configurable user control
- Ultra-thin mounting profile

## Description

The 4-Zone Force Sensing Resistor® (FSR®) paired with a suitable actuator can be implemented as a finger-actuated "mouse" pointing module. This pointing module provides accurate 360-degree mouse control. Users control direction by applying pressure in the direction of the desired movement and adjust speed by altering the amount of pressure on the device.
