

# THERMISTORS

## NTC Radial Lead Types

### Description

NTE compensation type NTC thermistors are small-sized radial lead ethoxyline resin-enveloped thermistors designed for high precision and fast response.

### Product Applications

- Home Appliances such as Air Conditioners, Refrigerators, Fans, Cookers, Washing Machines, Microwave Ovens, Radios, TVs, etc.
- Automotive Electronics
- Computers, Digital Meters

### Specifications

**Max. Power Rating (at 25°C):** 450mW

**Zero Power Resistance (at 25°):** ±10%

**Dissipation Factor:** ≥15mW/°C

**Thermal Time Constant:** ≤15 sec

**Insulation Resistance:** ≥100MΩ

**Operating Temperature Range:** -40° to +125°C
