

422B Aerosol

Silicone Modified Conformal Coating

422B is a 1-part, acrylic-silicone blend conformal coating that cures to a durable, flexible and smooth finish. It is easy to apply and can be handled in only 8 minutes. It may be removed with appropriate strippers or soldered through for repair or rework.

422B is designed for applications where both high service temperature and flexibility are required. It puts minimum stress on components during thermal cycling, making it ideal for applications that involve a wide temperature range. It provides strong protection against moisture, corrosion, fungus, dirt, dust, thermal shock, short circuits, high-voltage arcing, and static discharge.

Features and Benefits

- Certified UL 94 V-0 (File# E203094)
- Maximum constant service temperature of 200 °C
- Fluoresces under UV-A light
- Excellent corrosion resistance

Available Packaging

Cat. No.	Packaging	Net Vol.	Net Wt.
422B-340G	Aerosol	425 mL	340 g
422B-340GCA	Aerosol	425 mL	340 g

Cured Properties

Resistivity	1.2 x 10 ¹⁵ Ω·cm
Dielectric Strength	1 056 V/mil
Dielectric Withstand Voltage	>1 500 V
Dielectric Constant @ 1 MHz	1.99
Dissipation Factor @ 1 MHz	0.012
Glass Transition Temperature (T _g)	29 °C
CTE Prior T _g	275 ppm/°C
Service Temperature Range	-40–200 °C

Usage Parameters

Dry Time To Handle (1 coat)	8 min
(2 coats)	15 min
Minimum Recoat Time	3 min
Recommended Film Thickness	25–75 µm
Theoretical Coverage @ 25 µm	4 200 cm ²

Uncured Properties

Viscosity @ 25 °C	6 cP
Density	0.81 g/mL
Percent Solids	8.6 %
Shelf Life	5 y
Calculated VOC	627 g/L

422B Aerosol

Application Instructions

Read the product SDS before using this product (downloadable at www.mgchemicals.com).

Recommended Preparation

Clean the substrate with Isopropyl Alcohol, MG #824, so the surface is free of oils, dust, and other residues.

Spray

1. Shake the can vigorously.
2. Spray a test pattern to ensure good flow quality.
3. Tilt the board at 45° and spray a thin, even coat from a distance of 20–25 cm (8–10 in). Use spray-and-release strokes with an even motion to avoid paint buildup in one spot. Start and end each stroke off the surface.
4. Wait 3 min before applying another coat, to avoid trapping solvent.
5. Rotate the board 90° and spray again to ensure good coverage.
6. Apply additional coats until desired thickness is achieved (go to step 3).
7. Let dry 10 min at room temperature before applying heat cure.
8. After use, clear the nozzle by inverting the can and briefly spraying until clear propellant comes out.

Cure Instructions

Allow to dry at room temperature for 48 hours, or after letting sit for 10 minutes, cure the coating in an oven for 20 min @ 65 °C.

Storage and Handling

Store between -5 and 40 °C in a dry area, away from sunlight (see SDS).
