

LTC7852 High Efficiency 6-Phase Step-Down Converter

DESCRIPTION

Demonstration circuit 2631A features the [LTC[®]7852](#) in two high output current, high efficiency step down converters each with its own assembly type. The converter for the -A assembly provides two 3-phase outputs of 1.0V/100A and 1.5V/100A. The -B assembly provides a single 6-phase 1.0V/200A output. Block diagrams are shown in Figure 3. Both converters operate over a 7V to 14V input voltage range at a switching frequency of 400kHz.

The power stage for each phase consists of a 5mm × 5mm DrMOS and 11.3mm × 11.0mm 0.25μH ferrite inductor with a DCR of 0.32mΩ typical. The LTC7852 employs a peak current mode architecture which allows accurate DCR sensing and sharing with sub-mOhm DCR inductors. The LTC7852 provides a three-state compatible PWM output for each DrMOS.

Additional features of the DC2631A include:

- Differential sensing for the output voltages of V_{OUT1} and V_{OUT2}

- IMON pins to monitor the inductor current of each rail.
- Optional resistors and jumpers to change the phase arrangement for V_{OUT1} and V_{OUT2} :
 - V_{OUT1} : 4ph, V_{OUT2} : 2ph
 - V_{OUT1} : 5ph, V_{OUT2} : 1ph
 - Note, the default arrangement is:
 V_{OUT1} : 3ph, V_{OUT2} : 3ph
- Optional resistors and jumpers to parallel V_{OUT1} and V_{OUT2} .
- RUN, PGOOD, PLLIN and CLKOUT pins

The LTC7852 data sheet provides a complete description of the IC operation and application information. The data sheet must be read in conjunction with the quick start guide.

PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ\text{C}$, for the -A Assembly

PARAMETER	CONDITIONS	VALUE
Input Voltage Range		7V to 14V
V_{OUT1}	$V_{IN} = 7\text{V to }14\text{V}$, $I_{OUT1} = 0\text{A to }100\text{A}$	$1.0\text{V} \pm 1.5\%$
I_{OUT1}	$V_{IN} = 7\text{V to }14\text{V}$, $V_{OUT1} = 1.0\text{V}$	100A
V_{OUT1} Typical Efficiency (See Figure 4)	$V_{IN} = 12\text{V}$, $I_{OUT1} = 100\text{A}$	90.3% Typical
V_{OUT2}	$V_{IN} = 7\text{V to }14\text{V}$, $I_{OUT2} = 0\text{A to }100\text{A}$	$1.5\text{V} \pm 2\%$
I_{OUT2}	$V_{IN} = 7\text{V to }14\text{V}$, $V_{OUT2} = 1.5\text{V}$	100A
V_{OUT2} Typical Efficiency (See Figure 5)	$V_{IN} = 12\text{V}$, $I_{OUT2} = 100\text{A}$	93.3% Typical
Nominal Switching Frequency		400kHz

DEMO MANUAL

DC2631A-A/DC2631A-B

PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ\text{C}$, for the -B Assembly

PARAMETER	CONDITIONS	VALUE
Input Voltage Range		7V to 14V
V_{OUT1}	$V_{IN} = 7\text{V to } 14\text{V}$, $I_{OUT1} = 0\text{A to } 200\text{A}$	$1.0\text{V} \pm 1.5\%$
I_{OUT1}	$V_{IN} = 7\text{V to } 14\text{V}$, $V_{OUT1} = 1.0\text{V}$	200A
V_{OUT1} Typical Efficiency (See Figure 6)	$V_{IN} = 12\text{V}$, $I_{OUT1} = 200\text{A}$	90.0% Typical
Nominal Switching Frequency		400kHz

QUICK START PROCEDURE

The evaluation setup for demonstration circuit 2631A-A/A-B is straight forward. Refer to the diagram shown in Figure 1.

Next, follow the procedure below:

- 1) With power off, connect the input supply, load and meters as shown in Figure 1. Preset the load to 0A and the V_{IN} supply to 0V.
- 2) Place the RUN1, RUN2 and 5V BIAS jumpers in the ON position.
- 3) Slowly increase the input voltage to 12.0V while monitoring V_{OUT1} and/or V_{OUT2} .
- 4) At an input voltage of 12.0V, check V_{OUT1} and/or V_{OUT2} . The output voltage(s) should be within the regulation limits shown in the Performance Summary table.
- 5) Apply full load to the output(s) and re-measure the output voltages. They should be within the regulation limits.
- 6) After the basic performance has been verified, the other aspects of performance can be measured and observed.

DYNAMIC LOAD CIRCUITS

The DC2631A-A/DC2631B-B provides a load step circuit for V_{OUT1} and V_{OUT2} . Each load step circuit consists of a load step MOSFET with a $2\text{m}\Omega$ sense resistor at its source. To use it, connect the output of a pulse generator between the PULSE GEN pin and the GND pin. Monitor the load step signal across the ISTEP+ and ISTEP- pins. Monitor the output voltage with the V_{OUT} BNC. See Figure 2 for the setup. For safe operation for a 0A to 200A load step, limit the duty cycle to 5% or less. The load step responses are shown in Figure 9 through Figure 11.

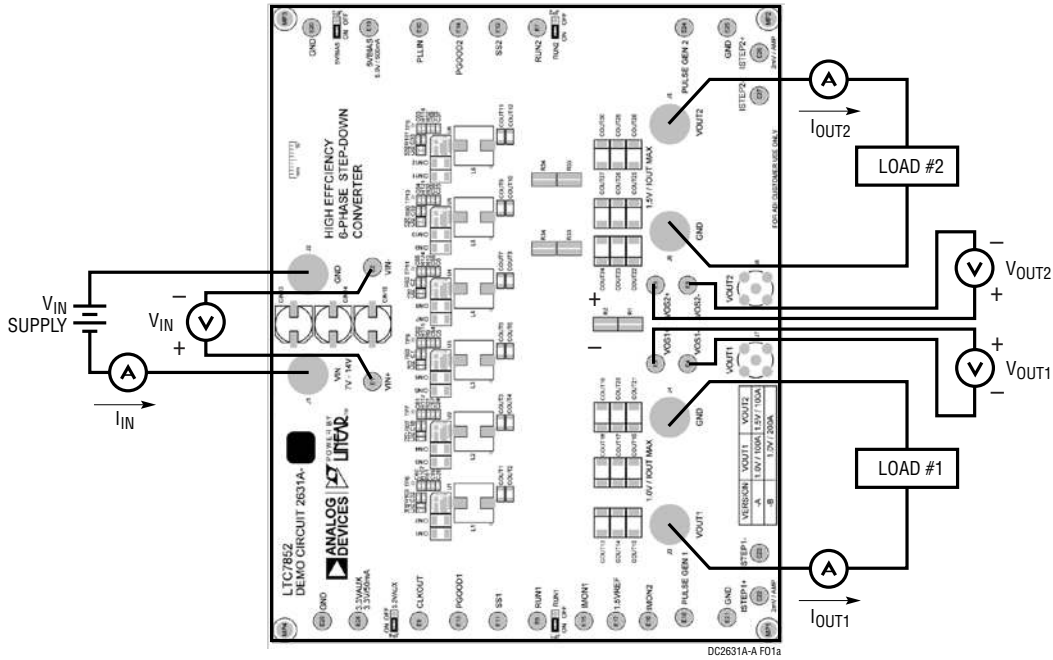

Note 1:

200 LFM airflow or more is recommended when full load is applied to both outputs of the -A assembly or when full load is applied to the output of the -B assembly. Thermal images are shown in Figure 7 and Figure 8.

Note 2:

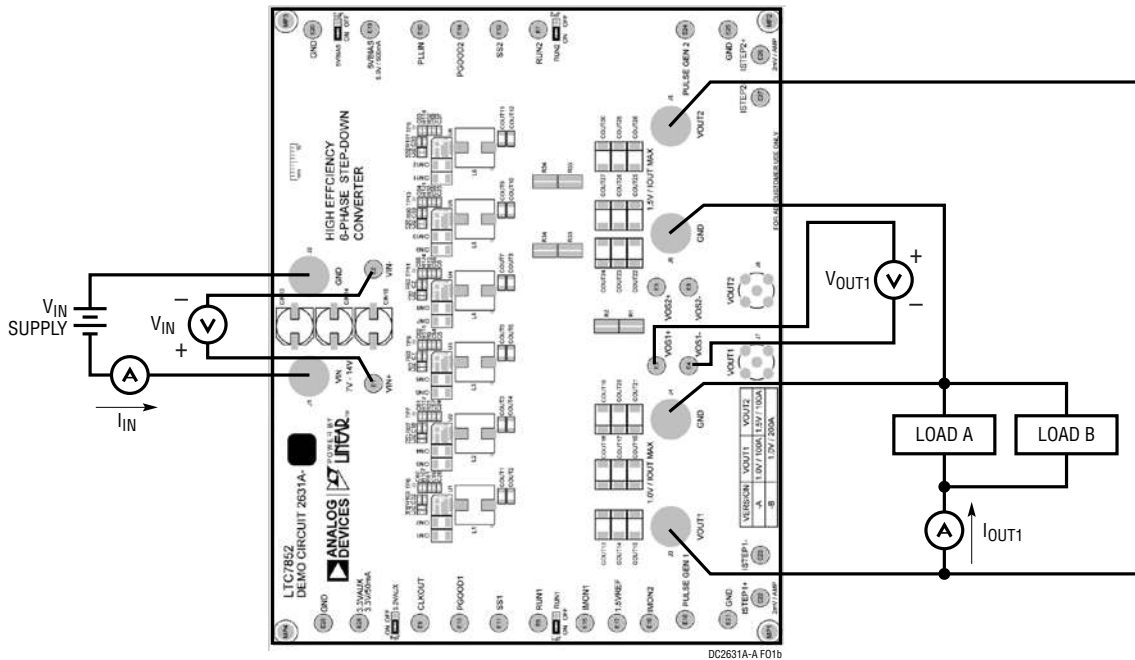

When powering the board, first connect the input supply to the DC2631A. Next, turn-on the input supply. Do not hot plug. This could cause large input voltage transients that may damage the converter.

QUICK START PROCEDURE

NOTE: FOR ACCURATE EFFICIENCY MEASUREMENTS, MONITOR V_{OUT1} ACROSS THE CERAMIC AT C_{OUT1} AND V_{OUT2} ACROSS THE CERAMIC AT C_{OUT7} . THE V_{OS}^+ TURRETS MONITOR THE OUTPUT VOLTAGE AT THE BULK OUTPUT CAPACITORS

SCHEMATIC DIAGRAM

SCHEMATIC DIAGRAM

Information furnished by Analog Devices is believed to be accurate and reliable. However, no responsibility is assumed by Analog Devices for its use, nor for any infringements of patents or other rights of third parties that may result from its use. Specifications subject to change without notice. No license is granted by implication or otherwise under any patent or patent rights of Analog Devices.

DEMO MANUAL

DC2631A-A/DC2631A-B

ESD Caution

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
