

CLX-14-12-F

Ruland CLX-14-12-F, 7/8" x 3/4" Rigid Coupling, Black Oxide Steel, One-Piece Clamp Style, 1 5/8" OD, 2 1/2" Length

Description

Ruland CLX-14-12-F is a one-piece rigid coupling with 0.8750" x 0.7500" bores, 1 5/8" OD, and 2 1/2" length. Proprietary Nypatch® anti-vibration coating on hardware allows for even seating of the screw, repeated screw installations, prevents galling, and maintains high holding power. It eliminates the need to treat screws upon receipt greatly reducing installation time. Forged screws test beyond ANSI standards to ensure maximum holding power. Tightly controlled bore tolerance of +.002"/+.0005" is maintained. CLX-14-12-F is made from 1215 lead-free steel with a proprietary black oxide finish that produces a fine glossy finish while increasing holding power and resisting corrosion. It is machined from solid bar stock that is sourced exclusively from North American mills and is RoHS3 and REACH compliant. CLX-14-12-F is manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

- 1. Align the CLX-14-12-F one-piece rigid coupling on the two shafts to be connected. There should be no misalignment.
- 2. Tighten the Nypatch® screws in two stages, starting with the inside screws. Using a 3/16 in torque wrench, tighten the inside screws to 85 lb-in which is half the recommended seating torque. Repeat for the outside screws, again tightening to half of the recommended seating torque.
- 3. Tighten the screws to the full recommended seating torque of 170 lb-in following the same pattern, starting with the inside screws first.
