## Most Stable Over Time

- <1% Capacitance Drift
- High Q Performance
- Tape & Reel Format
- In Stock and Ready to Ship

Introducing the JZ\_HV and JR\_HV Series:  
High Voltage in a small package design!

2250 Northwood Drive  
Salisbury, Maryland 21801  
Phone: 410.749.2424  
www.voltronicscorp.com

We now offer our JZ and JR series in a High-Voltage package: the JZ\_HV and JR\_HV. See pages 3 and 5 respectively for further details and be sure to order your engineering kits today!

Dear Valued Customer:

Voltronics has been offering high-performance, high Q, half-turn trimmer capacitors for over two decades. The J-Series is a proven performer that delivers uncompromising stability for even the most demanding applications, such as RFID, medical devices, cellular technologies, and much more.

*In years prior, we offered the J-Series exclusively to the United States but through recent acquisition as the manufacturer, we now supply the entire line worldwide.*

As indicated in the pages of this brochure, we offer the series in a variety of packages and specifications. Some additional information about the J-Series includes the following:

- We have sold tens of millions of J-Series components.
- They are the component of choice in thousands of designs worldwide.
- We offer direct-cross replacements for Sanshin part numbers.
- We offer engineering kits for all our J-Series components.

When your design demands indiscriminate performance, and when reliability becomes a high priority, choose the very best, which is the Voltronics J-Series ceramic chip trimmer capacitors.

Sincere regards,

The Voltronics Team

**World-Class Technology  
Worldwide Availability**

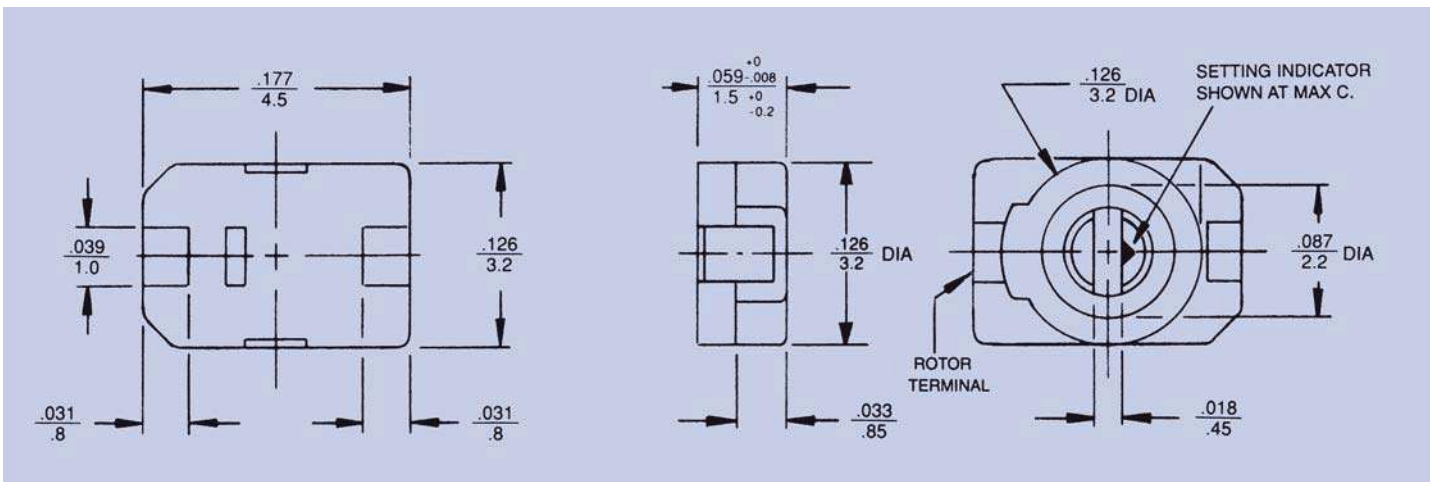

# Product Selection Guide

Product Line	Actual Size Length x Width x Height	Part Number	Cap. Range		Temperature Coefficient	SRF GHz	Mounting	Page
			Min.	Max. pF				
JZ and JZ_HV*	.177 x .126 x .059 in 4.5 x 3.2 x 1.5 mm	JZ030	1.5 –	3.0	0±200	2.1	Surface	2 & 3
		JZ060	2.0 –	6.0	0±300	1.5		
		JZ080	3.0 –	8.0	-750±500	1.25		
		JZ100	2.0 –	10.0	0±300	1.16		
		JZ150	3.0 –	15.0	0±300	0.92		
		JZ200	4.5 –	20.0	0±500	0.81		
		JZ300	5.5 –	30.0	-750±500	0.7		
		JZ400	8.0 –	40.0	-750±500	0.6		
* Note: We now offer the series in a HIGH VOLTAGE VERSION. The JZ_HV series specifications are identical to the specifications listed above with this important exception: <b>DC Working Voltage 350DC, Withstanding Voltage 750.</b>								
JR and JR_HV*	.138 x .122 x .045 in 3.5 x 3.1 x 1.15 mm	JR030	1.5 –	3.0	0±200	2.9	Surface	4 & 5
		JR060	2.0 –	6.0	0±300	2.05		
		JR080	3.0 –	8.0	-750±500	1.8		
		JR100	2.0 –	10.0	0±300	1.6		
		JR150	3.0 –	15.0	0±500	1.3		
		JR200	4.5 –	20.0	0±500	1.15		
		JR300	5.5 –	30.0	-750±500	0.92		
		JR400	8.0 –	40.0	-750±500	0.84		
* Note: We now offer the series in a HIGH VOLTAGE VERSION. The JR_HV series specifications are identical to the specifications listed above with this important exception: <b>DC Working Voltage 350DC, Withstanding Voltage 750.</b>								
JV	.126 x .098 x .049 in 3.2 x 2.5 x 1.25 mm	JV010	0.5 –	1.0	0±300	4.6	Surface	6
		JV025	0.65 –	2.5	0±300	2.9

J-Series engineering kits are a great way to become familiar with our products. Each kit contains 4 or 5 units of every value. Please be sure to inquire about tuning tools when ordering.  
 \* Tuning tools are included with this kit.  
 \*\* Tuning tools are not included with this kit. Please inquire about tuning tools when ordering.

## Washing Instructions:

The J-Series trimmer capacitors can withstand cleaning cycles up to 10 PSI and have been used by customers for more than a decade in many diverse environmental conditions. Without knowing your particular washing or cleaning environment, we recommend these basic guidelines:

- 1) Water wash or isopropyl alcohol cleaning agents are acceptable providing that baths are clean and uncontaminated. For maximum effectiveness, the cleaning process should occur immediately after soldering.
- 2) Either brush or spray methods are acceptable.
- 3) \*Drying out components with forced hot air is highly recommended.
- 4) Also, we do recommend turning the tuning screw 3 or 4 complete revolutions prior to arriving at the final "set."

\* If a water wash process is used and water does get inside, we recommend that the parts be heated above 100C for a minimum of 15 minutes, so that the water evaporates. After this, the rotor should be turned 1-2 times to redistribute the internal grease.

Ceramic & Microwave Products (CMP) designs, manufactures and sells special electronic components and systems, including high-performance filters, switches, capacitors and EMI and cosite signal interference solutions. Our products are used in military, space, telecom infrastructure, medical and industrial applications where function and reliability are crucial.
