

Aluminum Heatsink Cooling Fan for LattePanda

SKU:FIT0504

INTRODUCTION

Is your LattePanda running hot and throttling?

This heat sink and fan combo will cool the CPU for smooth performance.

The fan keeps the unit running at a stable temperature. The 2-Pin jumper wire makes it easily to connect with the CN2 headers on the board.

This fan is low noise and has a thermal pad on the back that can stick on the metal shield on the board. With its aluminum casing, heat from CPU will be absorbed fast, giving you better performance. This is a simple and effective way to make the LattePanda cool!

SPECIFICATION

- Operating Voltage: 5v
- Operating Current: 0.14A
- Rated Speed: 6500 RPM
- Cable Length: 20cm
- Interface Type: 2.54mm 2-Pin DuPont Female Connector
- Dimension: 34.5 * 34.5 * 10 mm
- Weight: 12g
